

PORTAL QA · ROUND 4 (DEEP)

Service Kanban + Card Modal deep audit

Round 4 deep audit. Two round-3 fixes confirmed (column naming, Add Card placement).

30+ findings on the modal itself: missing checklists, native date input vs calendar picker, missing empty-state copy on labels and assignees, icon mismatch on description, footer date format, missing share icon, comment-input style differences. Several filter and header gaps too.

Round 4 deep findings: 2 done · 24 open · 4 fyi

Status legend: **DONE** shipped · **OPEN** needs work · **NO ACTION** acceptable.

This document is interactive. Build checklist on the last page lists every still-open item. Tick each as it ships, save the PDF.

Still open

Each entry: where it stood (lineage from previous rounds), round 4 status, and what's left.

MED

OPEN

#3. Filters bar missing Labels filter

Where to see: Any service kanban → filters bar above the columns. Look for a Labels filter dropdown.

Where it stood: Not flagged previously.

Round 4 status: Our build's filters bar has Search + Assignee + Labels + Priority + Due date + Group + Sort. Portal has Search + Assignee + Priority + Due date only. Labels filter is missing.

What's left: Add Labels filter dropdown after Assignee. Pull from the workspace label catalog.

MED

OPEN

#4. Filters bar missing Group selector (no swimlanes)

Where to see: Any service kanban → far right of the filters bar. Look for a Group selector.

Where it stood: Not flagged previously.

Round 4 status: Our build has "Group: None" selector for swimlane grouping (by priority, assignee, or label). Portal has no equivalent — board cannot be sliced by groups.

What's left: Add Group selector. Options: None / Priority / Assignee / Labels. When set, render the column with horizontal swimlanes for each group.

MED

OPEN

#5. Filters bar missing Sort selector

Where to see: Any service kanban → far right of the filters bar. Look for a Sort selector.

Where it stood: Not flagged previously.

Round 4 status: Our build has "Sort: Manual" selector with options for due date, priority, recently updated, etc. Portal has no equivalent — cards stay in insertion order.

What's left: Add Sort selector. Options: Manual / Due date / Priority / Recently updated.

LOW

OPEN

#6. Filter pill labels differ

Where to see: Any service kanban → filters bar → existing filter dropdowns. Compare label form ('All Priorities' vs 'Priority').

Where it stood: Not flagged previously.

Round 4 status: Portal: "All Priorities" / "All Assignees" (verbose). Ours: "Priority" / "Assignee" (label-form). The portal version reads as a default selection; ours reads as a filter category.

What's left: Match our build's shorter label form. Show "Priority" by default, swap to the active filter value when set.

MED

OPEN

#7. Board header missing Board Settings button

Where to see: Any service kanban → top right of the board header. Should have Star + Project Brief + Board Settings + Members + Analytics buttons.

Where it stood: Not flagged previously.

Round 4 status: Our board header has Star + Project Brief + Board Settings + Members + Analytics buttons. Portal has only Star + Project Brief. Board Settings (column config, board templates) and Analytics (jump to filtered analytics) are missing.

What's left: Add Board Settings button (gear icon) and Analytics button (chart icon) to the board header right side.

MED

OPEN

#8. Board header missing Members count + face stack

Where to see: Any service kanban → top right of the board header → look for a Members pill with a face stack of avatars.

Where it stood: Not flagged previously.

Round 4 status: Our board header has a "Members 2" pill with a face stack of avatars. Click opens a member-management panel for the board. Portal has no equivalent.

What's left: Add the Members pill with face stack. Click opens the board's member access panel.

MED

OPEN

#9. Card tile missing due-date pill at top right

Where to see: Any service kanban → any card in any column → top-right of the card tile. Look for a date pill.

Where it stood: Not flagged previously.

Round 4 status: Our card tiles render a date pill at top-right (e.g. "May 19", "May 30"). Portal cards don't show dates on the tile. The dates only surface inside the modal.

What's left: Add a date pill at top-right of each card tile with the due date in MMM D format. Color the pill red ("Overdue 2d") when overdue.

MED

OPEN

#10. Card tile missing recurrence loop icon

Where to see: Any service kanban → any card with a recurrence rule. Look for a small loop (■) icon on the card tile.

Where it stood: Not flagged previously.

Round 4 status: Our card tiles show a small loop icon (■) when the card has a recurrence rule. Portal cards don't. Recurring cards are invisible from the board view; you have to open the modal to see they recur.

What's left: Render the loop icon on the card tile next to the comment count when recurrence is set. Dim it when paused.

LOW

OPEN

#11. Priority shown as MEDIUM pill on portal vs colored stripe on ours

Where to see: Any service kanban → any card in any column → priority indicator. Compare 'MEDIUM' pill vs colored left-stripe.

Where it stood: Not flagged previously.

Round 4 status: Portal renders priority as a MEDIUM pill below the title, even when priority is the default Medium. Ours uses a colored left-stripe accent (red high, orange medium, etc.) and doesn't render a pill for the default value. The portal version is loud for the average case.

What's left: Switch to the left-stripe pattern. Reserve the pill for severity = critical or priority = high+.

LOW

OPEN

#12. Done column titles don't strike through

Where to see: Any service kanban → Done column → look at the card titles. Compare strike-through vs normal weight.

Where it stood: Not flagged previously.

Round 4 status: Our Done column renders card titles with a line-through (visual confirmation of completion). Portal renders them in normal weight, no decoration.

What's left: Apply text-decoration: line-through on .card-title within the Done column.

LOW

OPEN

#13. Done card date pill missing checkmark prefix

Where to see: Any service kanban → Done column → date pill on each card. Look for ✓ prefix.

Where it stood: Not flagged previously.

Round 4 status: Our Done cards show "✓ Apr 22" (checkmark prefix on the date). Portal shows just the date.

What's left: Prefix the date with a small ✓ icon when the card is in the Done column.

LOW

OPEN

#14. Blocked empty state copy is shorter on portal

Where to see: Any service kanban → Blocked column with no cards → empty state copy.

Where it stood: Not flagged previously.

Round 4 status: Portal: "No tasks". Ours: "No cards yet — drag one in from another list." (tells the user how to populate the column).

What's left: Match the longer copy: "No cards yet, drag one in from another list." (Replace em dash with comma per house style.)

HIGH

OPEN

#15. Due date / Start date pickers don't adapt to dark mode

Where to see: Any service kanban → click any card → card modal → Due date or Start date field. Click the field. Test in BOTH light and dark mode.

Where it stood: User-flagged in round 4 follow-up. Originally noted as "native input vs custom picker"; refined here based on actual rendering.

Round 4 status: The date inputs do open the browser's native date picker when clicked (so the picker affordance exists). The bug is that in dark mode, the placeholder text ("mm/dd/yyyy") and the small calendar icon render in near-black on the dark-grey input background — both are nearly invisible. Once the picker overlay opens, it stays in light-mode chrome (white background, dark text on a dark page) because the CSS doesn't declare color-scheme: dark on the date input.

What's left: Two fixes. (1) Add color-scheme: dark on :root or html when dark mode is active so the browser's native date picker adapts (Chrome, Safari, Firefox all respect this). (2) Restyle the input itself: placeholder color should be a light-grey (e.g. #8E8E93) on dark backgrounds, and ::-webkit-calendar-picker-indicator should use filter: invert(1) brightness(2) so the calendar icon shows light in dark mode. Both fixes are CSS-only.

HIGH

OPEN

#16. Card modal missing Checklist section entirely

Where to see: Any service kanban → click any card → card modal → look below Description. Should have a Checklist section with '+ Add Task'.

Where it stood: User-flagged in round 4. Not previously documented.

Round 4 status: Our card modal has a "Checklist" section with "+ Add Task" affordance. Portal modal has no checklist section at all — between Description and Footer there's nothing.

What's left: Add the Checklist section below Description. Each task: checkbox + title + delete-on-hover. "+ Add Task" footer. Persist tasks per card.

LOW

OPEN

#17. Description icon: portal uses pencil, ours uses doc

Where to see: Any service kanban → click any card → card modal → Description label. Compare icon (pencil vs doc).

Where it stood: User-flagged in round 4.

Round 4 status: Portal Description label uses pencil icon (✎). Ours uses doc/page icon. Different semantic: pencil implies editing, doc implies content.

What's left: Match our build: use the doc/page icon for Description. Pull from Heroicons /24/outline/DocumentTextIcon.

LOW

OPEN

#18. Footer date format different

Where to see: Any service kanban → click any card → card modal → bottom of the modal, footer line.

Where it stood: User-flagged in round 4.

Round 4 status: Portal footer: "Created 10 Apr 2026" (DD MMM YYYY). Ours: "Created May 3, 2026" (MMM D, YYYY). Different conventions.

What's left: Match our build's MMM D, YYYY format. Apply consistently across all date displays in the app.

LOW

OPEN

#19. Footer shows only Created date, not Created + Due

Where to see: Any service kanban → click any card → card modal → bottom of the modal, footer line. Should show both Created date and Due date.

Where it stood: Not previously documented.

Round 4 status: Portal: "Created 10 Apr 2026" only. Ours: "Created May 3, 2026 · Due May 19, 2026" (both joined with middot). Both dates in one footer line gives operators the temporal context at a glance.

What's left: Append " · Due " to the footer when due date is set.

LOW

OPEN

#20. Labels empty state missing "No labels" copy

Where it stood: User-flagged in round 4.

Round 4 status: Portal Labels section shows just a "+" plus icon when empty. Ours shows "No labels" copy + "+" so the empty state is clearly an empty state.

What's left: Add "No labels" muted-text copy next to the "+" icon when no labels are assigned.

MED

OPEN

#21. Assignees empty state missing copy

Where to see: Any service kanban → click any card → card modal → Assignees section (when no one assigned).

Where it stood: Not previously documented.

Round 4 status: Same pattern as Labels. Portal shows just "+" when no assignees. Ours shows the picker with proper affordance.

What's left: Add empty-state copy when no assignees: e.g. "Unassigned" + "+" to add. Better: render an avatar slot showing "Unassigned" so the field has structure.

LOW

OPEN

#22. Status field: dropdown vs inline-edit

Where to see: Any service kanban → click any card → card modal → Status field. Compare dropdown (with chevron) vs inline-edit pattern.

Where it stood: Not previously documented.

Round 4 status: Portal: dropdown pill with chevron ("To Do ▼"). Ours: inline label + dot + text ("● To Do") with click-to-edit. Inline pattern is the house style — pencil-less editing, click anywhere.

What's left: Switch Status to inline-edit pattern. Click on the value to open a status picker overlay.

LOW

OPEN

#23. Priority field: dropdown vs inline-edit

Where to see: Any service kanban → click any card → card modal → Priority field. Same comparison as Status.

Where it stood: Not previously documented.

Round 4 status: Same as Status. Portal uses dropdown with chevron; ours uses inline-edit.

What's left: Switch Priority to inline-edit pattern.

LOW

OPEN

#24. Effort pluralization: "slots" shown even at 0/1

Where it stood: Not previously documented.

Round 4 status: Portal shows "slots" (plural) regardless of value. Ours shows "slot" (singular) when value = 1. Minor copy nit.

What's left: Pluralize correctly. "1 slot" / "2 slots".

MED

OPEN

#25. Card modal Share icon missing on portal

Where to see: Any service kanban → click any card → card modal → top-right toolbar. Compare icons present.

Where it stood: Not previously documented.

Round 4 status: Our card modal top-right has Bookmark + Share + Kebab + Close. Portal has Bookmark + Kebab + Close. Share icon (and the share-card flow) is missing.

What's left: Add Share icon to the toolbar. Click opens a Share modal (copy link, share with team members, send pre-read).

LOW

OPEN

#26. Activity tab name: "Activity" vs "Activity Log"

Where it stood: Not previously documented.

Round 4 status: Portal: "Activity". Ours: "Activity Log". Both work; ours is more explicit about what the tab contains.

What's left: Match our build: "Activity Log". Or keep "Activity" if the dev prefers brevity — flag as decision, not bug.

LOW

OPEN

#27. Comment hint missing Ctrl alternative

Where to see: Any service kanban → click any card → card modal → right pane → bottom of the comments area, the input placeholder.

Where it stood: Not previously documented.

Round 4 status: Portal: "(■+Enter to send)". Ours: "(■/Ctrl+Enter to send)". Windows users on portal have no shortcut hint; ours covers both platforms.

What's left: Match: "(■/Ctrl+Enter to send)".

LOW

OPEN

#28. Send button style: solid blue button vs text-only

Where to see: Any service kanban → click any card → card modal → right pane → Send button below the comment input.

Where it stood: Not previously documented.

Round 4 status: Portal Send button is a solid blue button with background. Ours is text-only minimal style. Solid blue is the right choice for a primary action; flagging the difference for awareness.

What's left: Decide which style is correct: text-only (current ours) vs solid blue (current portal). Probably solid blue is the right call — primary action gets tier-1 treatment.

Done

Items shipped (this round or earlier) and still working.

LOW

DONE

#1. Fourth column renamed to "Needs Review"

Where it stood: Round 3 W6.

Round 4 status: Service kanban now shows "Needs Review" matching Ops. Done.

MED

DONE

#2. "+ Add a card" only on the To Do column

Where it stood: Round 3 W7.

Round 4 status: Service kanban now matches the rule: "+ Add a card" only at the bottom of To Do. Done.

For your awareness

No-action items. Context only.

INFO

NO ACTION

#29. Recurring tasks (Repeat field) shipped on portal

Where to see: Any service kanban → click any card → card modal → Repeat field (between Start date and Labels).

Where it stood: Recurring tasks v1 shipped per the recurring-tasks-spec doc.

Round 4 status: Repeat field present, popover opens, presets work, custom editor works. Confirmed wired up. Listed for the record.

INFO

NO ACTION

#30. Status pills, severity stripes match in semantics

Where to see: Any service kanban → status pills on cards (red, orange, green) and severity left-stripes.

Where it stood: Round 1 verified.

Round 4 status: Both builds use red for blocked/critical, orange for medium/at-risk, green for done/track. Semantic colors aligned.

Build checklist

Every still-open item from above. Tick each as it ships.

- ☐ **MED** **#3. Filters bar missing Labels filter**
 Add Labels filter dropdown after Assignee. Pull from the workspace label catalog.
- ☐ **MED** **#4. Filters bar missing Group selector (no swimlanes)**
 Add Group selector. Options: None / Priority / Assignee / Labels. When set, render the column with horizontal swimlanes for each group.
- ☐ **MED** **#5. Filters bar missing Sort selector**
 Add Sort selector. Options: Manual / Due date / Priority / Recently updated.
- ☐ **LOW** **#6. Filter pill labels differ**
 Match our build's shorter label form. Show "Priority" by default, swap to the active filter value when set.
- ☐ **MED** **#7. Board header missing Board Settings button**
 Add Board Settings button (gear icon) and Analytics button (chart icon) to the board header right side.
- ☐ **MED** **#8. Board header missing Members count + face stack**
 Add the Members pill with face stack. Click opens the board's member access panel.
- ☐ **MED** **#9. Card tile missing due-date pill at top right**
 Add a date pill at top-right of each card tile with the due date in MMM D format. Color the pill red ("Overdue 2d") when overdue.
- ☐ **MED** **#10. Card tile missing recurrence loop icon**
 Render the loop icon on the card tile next to the comment count when recurrence is set. Dim it when paused.
- ☐ **LOW** **#11. Priority shown as MEDIUM pill on portal vs colored stripe on ours**
 Switch to the left-stripe pattern. Reserve the pill for severity = critical or priority = high+.
- ☐ **LOW** **#12. Done column titles don't strike through**
 Apply text-decoration: line-through on .card-title within the Done column.
- ☐ **LOW** **#13. Done card date pill missing checkmark prefix**
 Prefix the date with a small ✓ icon when the card is in the Done column.
- ☐ **LOW** **#14. Blocked empty state copy is shorter on portal**
 Match the longer copy: "No cards yet, drag one in from another list." (Replace em dash with comma per house style.)
- ☐ **HIGH** **#15. Due date / Start date pickers don't adapt to dark mode**
 Two fixes. (1) Add color-scheme: dark on :root or html when dark mode is active so the browser's native date picker adapts (Chrome, Safari, Firefox all respect this). (2) Restyle the input itself: placeholder color should be a light-grey (e.g. #8E8E93) on dark backgrounds, and ::-webkit-calendar-picker-indicator should use filter: invert(1) brightness(2) so the calendar icon shows light in dark mode. Both fixes are CSS-only.

- ☐ **HIGH** **#16. Card modal missing Checklist section entirely**
Add the Checklist section below Description. Each task: checkbox + title + delete-on-hover. "+ Add Task" footer. Persist tasks per card.
- ☐ **LOW** **#17. Description icon: portal uses pencil, ours uses doc**
Match our build: use the doc/page icon for Description. Pull from Heroicons /24/outline/DocumentTextIcon.
- ☐ **LOW** **#18. Footer date format different**
Match our build's MMM D, YYYY format. Apply consistently across all date displays in the app.
- ☐ **LOW** **#19. Footer shows only Created date, not Created + Due**
Append " · Due " to the footer when due date is set.
- ☐ **LOW** **#20. Labels empty state missing "No labels" copy**
Add "No labels" muted-text copy next to the "+" icon when no labels are assigned.
- ☐ **MED** **#21. Assignees empty state missing copy**
Add empty-state copy when no assignees: e.g. "Unassigned" + "+" to add. Better: render an avatar slot showing "Unassigned" so the field has structure.
- ☐ **LOW** **#22. Status field: dropdown vs inline-edit**
Switch Status to inline-edit pattern. Click on the value to open a status picker overlay.
- ☐ **LOW** **#23. Priority field: dropdown vs inline-edit**
Switch Priority to inline-edit pattern.
- ☐ **LOW** **#24. Effort pluralization: "slots" shown even at 0/1**
Pluralize correctly. "1 slot" / "2 slots".
- ☐ **MED** **#25. Card modal Share icon missing on portal**
Add Share icon to the toolbar. Click opens a Share modal (copy link, share with team members, send pre-read).
- ☐ **LOW** **#26. Activity tab name: "Activity" vs "Activity Log"**
Match our build: "Activity Log". Or keep "Activity" if the dev prefers brevity — flag as decision, not bug.
- ☐ **LOW** **#27. Comment hint missing Ctrl alternative**
Match: "(■/Ctrl+Enter to send)".
- ☐ **LOW** **#28. Send button style: solid blue button vs text-only**
Decide which style is correct: text-only (current ours) vs solid blue (current portal). Probably solid blue is the right call — primary action gets tier-1 treatment.
