

PORTAL QA · ROUND 4

Clients page regression check + status update

Round 4 status: filter buckets now sum to All correctly (the round 3 W5 bug is fixed). The On Fire bucket still reads 0 while Portfolio Health on Home says 14, but that's tracked as Home item #11. About tab now shows rich job titles for team members (matches the workload fix on Analytics).

Round 4: **1** done · **0** open · **1** fyi

Status legend: **DONE** shipped this round · **STILL DONE** shipped earlier, still working · **PARTIAL** partly shipped · **OPEN** still missing · **NO ACTION** acceptable.

This document is interactive. The build checklist on the last page lists every item still open. Click each checkbox as the dev ships it, then save the PDF.

Done

Items shipped (this round or earlier) and still working. Listed for the record so we agree on what closed.

HIGH

DONE

#1. Filter buckets now sum to All

Where it stood: Round 3 wiring W5: All said 139, buckets summed to 3. Math was broken upstream.

Round 4 status: Counts now reconcile: All 139 = 0 (On Fire) + 1 (At Risk) + 47 (On Track) + 85 (Onboarding) + 6 (Paused) + 0 (Archived) = 139. Done.

For your awareness

No-action items. Listed so the context isn't lost, but nothing the portal dev needs to do.

LOW

NO ACTION

#2. About tab renders rich job titles for the team

Where it stood: Not flagged previously.

Round 4 status: Worth flagging as positive: the Project Team grid on Client > About shows job titles (AI Transformation Lead, MLOps Engineer / AI Application Developer, WordPress Developer, Data Engineer, Chief Prompt Engineer, etc.) instead of access roles. Same fix that landed on Analytics workload.
