

PORTAL QA · ROUND 1

Workflow 4 · Time-off flow audit

May 15, 2026

Workflow 4 of 10 in the May 15 deep-testing pass. Walked the time-off flow on the portal: tried to submit from Account → Time off (empty state, no submit affordance) → followed the directive to Ops → Time off Schedules → clicked + Request time off → inspected the form fields against the TimeOffRequest spec in `src/types/flizow.ts`.

Two structural gaps open. First, submission belongs in Account → Time off per spec; portal puts it on Ops only. Second, the submission form is missing Type, Hours, and Use Transfer Credit fields that the data model expects. Without them, leave-balance + credit-ledger math can't run.

Did NOT submit a TEST time-off request because the form is structurally incomplete and submitting would write a partial record. Will revisit once the missing fields land.

Approve + bell-notification flows untested for the same reason.

3 findings: 2 MED + 1 INFO.

3 findings · 0 HIGH · 2 MED · 0 LOW · 1 INFO

Status legend: **HIGH** blocks scanning / breaks workflow · **MED** meaningful divergence · **LOW** polish · **INFO** matches or working as intended.

Each finding carries two chips. **Severity** (HIGH / MED / LOW / INFO) maps to impact. **History tag** (**FROM PREVIOUS QA** = carried over from prior QA, **NEW** = surfaced this round) shows which items the dev has been sitting on vs. fresh observations. **FROM PREVIOUS QA** items

need triage first.

MED

NEW

Account → Time off has no submission UI; empty state directs the user to the Ops page

Where to see: Top-right avatar → Account settings → Time off (under MY ACCOUNT). Look for a submit affordance + tracking of own requests.

Portal: Page renders only an empty state: *"No time-off requests yet. Submit requests from the Ops page."* No **Submit** button. No status sections (Pending review / Approved / Denied / Past). The page is currently read-only-and-empty for any user who hasn't submitted from elsewhere.

CLAUDE.md spec: *"Account → Time off — submit / track requests with status sections (Pending review, Approved, Denied, Past)."*

Original: Submission UI lives on the Account → Time off page. Member fills the request inline; the requester is implied as the current user. Below the form, four status sections show the requester's own request history (Pending / Approved / Denied / Past).

Ops → Time off Schedules is for Owner/Admin to **approve others' requests**, not the entry surface for submission.

Fix: Two pieces:

- **Move submission UI into Account → Time off.** Add a Request time off button; on click, open an inline form (or use the existing Ops form atom) bound to the current user.
- **Add status sections** (Pending review, Approved, Denied, Past) below the submit affordance. Each section lists the requester's own requests in that state.
- **Keep the Ops calendar + approval workflow as-is** — that's the right place for Owner/Admin to triage incoming requests.

MED

NEW

Time-off submission form (Ops) missing Type, Hours, and Transfer Credit fields

Where to see: Top → Ops → Time off Schedules tab → click + **Request time off** on the right side.

Portal: Form has four fields:

- Member dropdown (select who the request is for)
- Reason (optional, e.g. Annual leave)
- Start date
- End date

Per the TimeOffRequest schema in *src/types/flizow.ts*, missing:

- **Type** (annual / sick / unpaid / other) — required per spec, drives leave-balance ledger.
- **Hours** (the hours field on TimeOffRequest) — without it, the leave is calendar-day-only with no way to express "half-day" or partial-day requests.
- **Use transfer credit** checkbox — surfaces the credit-ledger balance + lets the requester redeem an earned credit (per the Holiday Observation system in CLAUDE.md).

Original: Form has all four user-facing fields: Member, Type (radio or dropdown), Date range (start + end + hours), Reason (optional), Use transfer credit (checkbox, shown only if balance > 0). The credit balance is displayed inline so the user knows what they have to spend.

Fix: Three field additions to the request form:

- **Type** <select> with options Annual / Sick / Unpaid / Other. Required.
- **Hours** input. Default to 8 hours × business-day count between Start and End dates. Editable for half-day requests.
- **Use transfer credit** checkbox. Show only if the requester's credit balance > 0. Render the balance inline (e.g. "Use 1 of your 2 transfer credits").

Functional · INFO severity (verified working)

INFO

NEW

Verified working: Ops → Time off Schedules calendar + side rail

Where to see: Top → Ops → Time off Schedules tab.

Portal: Page renders the calendar (May 2026, today highlighted, holidays shown e.g. PH Labor Day on May 1), a month navigator, a Today button, and a side rail with three sub-tabs (Approvals / Rules / Conflicts). Approvals currently empty ("No pending requests.").

Original: Same shape.

Fix: None. Calendar surface working.

Build checklist

Every actionable finding (HIGH / MED / LOW). INFO items are listed in the body but not in the checklist. Tick each as it ships.
