

PORTAL QA · ROUND 5

Clients page audit

May 14, 2026

Round 5 verification of the Clients page. Dev claimed all R4 items shipped — live check confirms a **mixed picture**: the Notes-tab "empty state rendered twice" issue appears closed (a default first note now materialises), and the icon-library deviations on the list sidebar are addressed. The four HIGH-severity items below are still wide open, including NEEDS ATTENTION rendering as an inline pill instead of two full cards, the Onboarding section labels not flipping from *FROM CLIENT / FROM US* to *NEEDED FROM CLIENT / WE TAKE CARE OF*, the client header still missing the "Client since" date and a populated MANAGER avatar, and account-manager assignment failing to propagate from the About tab to the header. 23 findings open total, sorted HIGH → LOW. Triage **FROM PREVIOUS QA** chips first — they're the items the dev marked shipped but didn't.

23 findings · 4 HIGH · 10 MED · 9 LOW · 0 INFO

Status legend: **HIGH** blocks scanning / breaks workflow · **MED** meaningful divergence · **LOW** polish · **INFO** matches or working as intended.

Each finding carries two chips. **Severity** (HIGH / MED / LOW / INFO) maps to impact. **History tag** (**FROM PREVIOUS QA** = carried over from prior QA, **NEW** = surfaced this round) shows which items the dev has been sitting on vs. fresh observations. **FROM PREVIOUS QA** items need triage first.

HIGH severity

HIGH

FROM PREVIOUS QA

NEEDS ATTENTION still renders a small inline pill instead of two full-width cards

Where to see: Top → Clients → click a client with overdue + at-risk tasks (Acme Corp on the portal seed) → Overview tab → NEEDS ATTENTION block above ACTIVE SERVICES.

Portal: Still a single small red pill that reads “2 overdue tasks” inline next to the section header. No icon, no subtitle, no card chrome. Just a chip.

Original: Two full-width cards in a 2-column row:

- **Card 1 — past due:** fire icon (orange/red), bold count (“1 card past due”), subtitle (“Conversion Optimization · tap to open”).

- **Card 2 — at risk:** chat-bubble icon (yellow), bold count (“1 at risk”), subtitle (“Conversion Optimization · review soon”).

Each card is clickable and jumps the user to the specific service that needs attention.

Fix: Replace the inline pill with the two-card slot component. Each card carries:

- a left-side icon (fire for past-due, chat-bubble for at-risk).
 - a bold count title (“1 card past due” / “1 at risk”).
 - a subtitle that names the service the count relates to + a hint about the action (“tap to open” / “review soon”).
 - a click target that opens the service detail.
-

HIGH

FROM PREVIOUS QA

Onboarding section labels still read “FROM CLIENT” / “FROM US”; should be “NEEDED FROM CLIENT” / “WE TAKE CARE OF”

Where to see: Top → Clients → client detail → Onboarding tab → expand any service card → read the two section labels (above the checkbox groups).

Portal: Still “FROM CLIENT” (with the person icon) and “FROM US” (with the key icon). Same labels as R4.

Original: “NEEDED FROM CLIENT” (with the person icon) and “WE TAKE CARE OF” (with a different glyph). The longer labels read as responsibility statements (“we need this from you” / “we will handle this”), not as bare directional markers.

Fix: Replace the two label strings in the onboarding checklist component:

- “FROM CLIENT” → **“NEEDED FROM CLIENT”**.
- “FROM US” → **“WE TAKE CARE OF”**.

Same labels appear on the Add client → Onboarding step modal; keep them consistent there too.

HIGH

FROM PREVIOUS QA

Client header still doesn't render the “Client since” date or a populated MANAGER avatar

Where to see: Top → Clients → click Acme Corp → the row of meta fields under the client name (between industry and the kebab menu).

Portal: Three slots:

- Industry chip (“Retail” with an × to clear).
- “Manager: None assigned” (with an ×).
- Date icon + em-dash (“—”).

Even with a manager assigned via the About tab, the header stays “None assigned” (see R4 #6 propagation finding). The “Client since” date never renders.

Original: Three labeled cells:

- industry icon + “SaaS / Tech”.
- person icon + **MANAGER:** + avatar (“NT”) + name (“Nikko Trinidad”).
- calendar icon + **Client since Sep 2024.**

Same row, three cells, all populated. No em-dashes; no × to clear.

Fix: Two fixes:

- **Render the “Client since” date** from *Client.createdAt* (format “Sep 2024” — month + year). Drop the “—” em-dash placeholder. If somehow the date is missing, hide the whole cell rather than render the dash.

- **Wire the MANAGER cell** to *Client.auid*. Lookup the user, render avatar + name. Restate the assignment from the About tab → Team panel so the two surfaces stay in sync.

HIGH

FROM PREVIOUS QA

Account-manager assignment from the About tab still doesn't propagate to the header

Where to see: Top → Clients → client detail → About tab → Team panel → Edit → assign an Account Manager. Save. Look at the header MANAGER cell.

Portal: Save succeeds in the About tab — the AM name appears in the Team panel. The header **MANAGER cell still reads “None assigned”**. The two surfaces drift; the user has to refresh the page to see the header catch up (and even then, sometimes doesn't).

Original: AM assignment writes to *Client.amId* and both surfaces re-render. Header MANAGER cell shows the avatar + name immediately on save. About → Team → ACCOUNT MANAGER section shows the same user. One write, two reactive renders.

Fix: The fix is a state-management plumbing issue:

- Confirm the About-tab AM control writes to the same store key the header reads from (almost certainly *Client.amId*).
- The header component needs to subscribe to *Client.amId* changes (not just snapshot once on mount).
- Verify with a manual repro: assign → watch header → should update within the same render cycle. Without a hard refresh.

MED severity

MED

FROM PREVIOUS QA

List view: last-activity timestamp coverage is still only on a handful of rows

Where to see: Top → Clients → scroll the list → look at the right edge of each row for a timestamp.

Portal: Same shape as R4. Most rows render no timestamp at all. Spot check of the first 8 rows on the portal: Alpine, Asset Maintenance, ATL Investments, B&E; Fire Protection, BASELINE, Berg — all blank. BELLE ET BLANC shows “7 Apr”. The rest of the page is the same story — ~10% coverage. User can't tell which clients have been touched recently.

Original: Every row has a timestamp, formatted as a weekday short label (“Wed”, “Mon”, “Tue”, “Sun”) for recent activity. Older activity rolls up to date format. Coverage is 100% because every client has at least an `updatedAt` timestamp from the moment it was seeded.

Fix: Two parts:

- **Data:** ensure every Client row has `updatedAt` populated. If the legacy import didn't backfill it, run a migration that sets `updatedAt = createdAt` for rows where it's null.
- **Render:** switch the format to the weekday-short pattern for the last 7 days, dd Mmm for older. Match the original's `Intl.DateTimeFormat` tokens (the original uses `{weekday: 'short'}` when within the current week).

MED

NEW

Service pill labels carry internal project IDs (“Account Management - 965199”)

Where to see: Top → Clients → any row → the service chips below the client name.

Portal: Service chips render the full legacy-import string including 6-digit numeric IDs:

- “Alpine Property Collective - Account Management - 965199”.
- “AMG - April Retainer - 1191171”.
- “AMG - March Retainer - 1175789”.

Three chips per row look near-identical because the client name is duplicated as the prefix. The IDs are noise to the user.

Original: Service chips show the clean short name only:

- “Brand Refresh Q2”.
- “Marketing Site v3”.
- “Conversion Optimiz...” (truncated only if it's a long name).

No client-name prefix (the row already shows the client name above). No internal IDs.

Fix: Strip the legacy “[ClientName] - [ServiceName] - [ID]” format down to just [ServiceName]. Either:

- **One-time data clean:** run a migration that splits each Service.name on “ - ”, keeps the middle segment, drops the prefix + suffix.

- Or **render-time strip:** if the legacy name can't be touched, parse it on render and show only the middle segment.

Data clean is the cleaner fix.

MED

FROM PREVIOUS QA

Hero logo tile: still wrong shape, corner radius, and palette

Where to see: Top → Clients → click any client → detail header → the coloured tile with the client initials on the left.

Portal: Still a light-blue rounded tile with the initials in white. Aspect ratio appears squarish but the tile is shorter than the title block next to it. Palette is pale blue (lighter than the brand blue used elsewhere).

Original: Square tile (aspect-ratio 1:1) with a richer purple-blue gradient. Corner radius around 12-14px. Aligns vertically with the centre of the title block.

Fix: Three fixes:

- Lock the tile to *aspect-ratio: 1 / 1* so it's always square.
- Use the purple-blue gradient palette (matches the avatar gradients on Members and Card assignees).
- Centre vertically against the title block, not the top of the header.

MED

FROM PREVIOUS QA

Onboarding service card subtitle still says “No items yet” instead of “[Template] · [N] items left”

Where to see: Top → Clients → client detail → Onboarding tab → each service card's subtitle line (under the service name).

Portal: Subtitle reads “No items yet” for every card, regardless of whether items exist.

Original: Subtitle is two pieces: the template name + the items-left count. Examples:

- “**Brand Refresh** · 3 items left”.
- “**Web Design — Full Stack** · 0 items left” (when complete).

Template name tells the user which onboarding checklist this service is using; items-left tells the user how much is still pending.

Fix: Subtitle formatter:

- Read the linked *Template.name* from the Service → Template ref.
- Count unchecked items across both sections (NEEDED FROM CLIENT + WE TAKE CARE OF).
- Render *{template} · {N} items left*. When count is 0, render *{template} · complete*.

MED

FROM PREVIOUS QA

Onboarding checkbox layout still single-column; original uses two-column wrap

Where to see: Top → Clients → client detail → Onboarding tab → expand any service card → look at the checkbox items inside each section.

Portal: Items render one per row, full-width. With 3-4 items per group the section feels sparse and the card scrolls more than necessary.

Original: Items wrap to two columns at the section width (roughly 600px). 4 items render as 2x2, 6 items as 3x2. Denser, easier to scan.

Fix: Switch the list container from a single vertically-stacked layout to a *grid-template-columns: 1fr 1fr; gap: 8px 16px* layout (or a flex-wrap equivalent). Keep the + *Add item* affordance at the end, spanning the full row width.

MED

FROM PREVIOUS QA

Quick Links still renders a globe icon for every link type

Where to see: Top → Clients → client detail → About tab → Quick Links panel → the icon on each link row.

Portal: Single globe icon for every link. Google Drive renders as globe. Asset Library would render as globe. No link-type signal.

Original: Icon picked per link type, parsed from the URL:

- **drive.google.com** → drive icon.
- **folder paths** → folder icon.
- **generic URL** → globe icon (default fallback).

Tested examples: Website (globe), Asset Library (folder), Shared Drive (drive).

Fix: Build a simple URL pattern matcher in the Quick Links panel render:

- *drive.google.com, onedrive.live.com, dropbox.com* → drive icon.
- *github.com, gitlab.com* → code icon.
- *figma.com* → design icon.
- anything else → globe (fallback).

Same matcher pattern the original uses; the icon set is in the icon-manifest doc.

MED

FROM PREVIOUS QA

About tab panel titles use sentence case; should be uppercase eyebrows

Where to see: Top → Clients → client detail → About tab → read the three panel headers (Client Contacts, Quick Links, Team).

Portal: “Client Contacts”, “Quick Links”, “Team” — all in Title Case, regular weight. Reads as panel names.

Original: “CLIENT CONTACTS”, “QUICK LINKS”, “TEAM” — all in uppercase, eyebrow style (bold, tighter letter-spacing, smaller font size). Matches the section eyebrows used elsewhere in the app (RELATIONSHIP, ACTIVE SERVICES, LATEST TASKS).

Fix: Switch the panel-header component to the eyebrow style class (the same one used by the section headers above the panels). Uppercase the strings in the data (or transform via *text-transform: uppercase*).

MED

FROM PREVIOUS QA

Service-row status pill still uses title case and no leading dot

Where to see: Top → Clients → client detail → Overview tab → ACTIVE SERVICES → the status pill next to each service name.

Portal: “At Risk” (Title Case), no leading bullet.

Original: “• ON FIRE”, “• ON TRACK”, “• AT RISK” — UPPERCASE with a leading coloured bullet that doubles as a status indicator.

Fix: In the service-row status pill component: uppercase the label + prefix a coloured bullet (· character or a small dot span) coloured to match the status. Reuse the status-colour map from the Clients list dot indicator.

MED

FROM PREVIOUS QA

Service-row progress: percentage shown but the bar element still missing or invisible

Where to see: Top → Clients → client detail → Overview tab → ACTIVE SERVICES row → right side of the row.

Portal: “Progress 0%” text visible, but no visible bar element underneath. Hard to verify at 0% since there's nothing to render; need a populated service to confirm. From the DOM it looks like the bar element exists but is rendered as a 0-fill on a transparent track.

Original: Bar element renders 3-4px tall, full-width of the right column, rounded corners, neutral-grey track, brand-blue fill at the percentage. Visible at all percentages including 0% (empty track shows the rail). Sits directly under the percentage text.

Fix: Add a track element under (or beside) the percentage:

- Height ~3-4px, full column width.
- Rounded corners.
- Neutral grey background (track).
- Brand-blue fill at `style={ width: `${pct}%` }`.
- Render the track even when pct is 0 so the user sees the rail (and the future fill).

MED

FROM PREVIOUS QA

Notes editor toolbar still uses text labels for H2/H3 + bare punctuation for lists

Where to see: Top → Clients → client detail → Notes tab → click into a note → look at the formatting toolbar above the editor.

Portal: Toolbar reads: *H2*, *H3* (text), B, I, S (icons), • (bullet character), 1. (text), link icon. Mixed-medium toolbar: some icons, some text.

Original: All-icon toolbar:

- H2 → heading-2 SVG.
- H3 → heading-3 SVG.
- Lists → bullet-list + numbered-list SVG icons (not the text bullet/1. characters).

Visual consistency across the row. Same toolbar atom the Weekly WIP editor uses.

Fix: Replace the four text/character buttons with the matching SVG icons. Use Heroicons *list-bullet*, *numbered-list*, and the heading-2 / heading-3 SVGs from the icon manifest. Same toolbar component the Weekly WIP page already ships.

LOW severity

LOW

FROM PREVIOUS QA

Status indicator dot in the Clients list still has no hover tooltip

Where to see: Top → Clients → hover the small coloured dot on the far left of any row.

Portal: Dot is a 8x8 coloured circle with no *title* and no *aria-label* attribute. Hover produces nothing. Screen reader users get no signal at all.

Original: Dot has both *title* and *aria-label* set to a long-form description of the status:

- Red → “On fire — needs attention now”.
- Amber → “At risk — review soon”.
- Blue → “Onboarding — first 30 days”.
- Green → “On track”.

Fix: Set both *title* and *aria-label* on each dot to the original's exact strings (see the four above). Same strings, same hyphen format. Verify with VoiceOver/NVDA that the label is announced.

LOW

FROM PREVIOUS QA

Section header timestamp still clusters left next to the eyebrow instead of right-aligning

Where to see: Top → Clients → client detail → Overview tab → NEEDS ATTENTION section → the timestamp next to the eyebrow.

Portal: “As of today” sits immediately right of the NEEDS ATTENTION eyebrow, on the left side of the header.

Original: “As of this morning” sits right-aligned on the row, balancing the eyebrow on the left. Same layout the SETUP & ONBOARDING section uses (count info right-aligned).

Fix: Wrap the section header in a flex row, push the timestamp to the right with *margin-left: auto* (or *justify-content: space-between* on the parent). The eyebrow stays anchored left; the timestamp anchors right.

LOW

FROM PREVIOUS QA

Timestamp copy still reads “As of today”; should be “As of this morning”

Where to see: Top → Clients → client detail → Overview tab → NEEDS ATTENTION section header.

Portal: Renders “As of today”.

Original: Renders “As of this morning”. The morning framing tells the AM these alerts are computed once at the start of the day rather than refreshed live, which is the actual behaviour. “Today” implies live; “this morning” sets the right expectation.

Fix: One-string change: “As of today” → “As of this morning”.

LOW

FROM PREVIOUS QA

Service-row favourite star still renders as thin outline with no visible active state

Where to see: Top → Clients → client detail → Overview tab → ACTIVE SERVICES row → the star icon at the far right of each service row.

Portal: Star is a thin outline glyph. Toggled-on state looks visually identical to toggled-off; both read as a slightly different stroke colour. User can't tell which services are starred at a glance.

Original: Toggled-on state is a **solid gold star** (#FACC15 family). Toggled-off is the thin grey outline. Strong contrast between states; starred services pop visually.

Fix: Swap the toggled-on star to a filled gold star (Heroicons *star* solid variant, *fill*="#FACC15"). Keep the outline variant for the toggled-off state. Hover state on toggled-off can preview the filled version at 50% opacity.

LOW

FROM PREVIOUS QA

RELATIONSHIP section header still missing the chat-bubble icon + subtitle stacking

Where to see: Top → Clients → client detail → About tab → top section header (before the Client Contacts + Quick Links panels).

Portal: Eyebrow text “RELATIONSHIP” with no icon. Subtitle “Who we talk to, and where to find their stuff” stacks underneath.

Original: Chat-bubble icon to the left of the “RELATIONSHIP” eyebrow. Subtitle right-aligned on the same row (not stacked). Same row layout as the SETUP & ONBOARDING header.

Fix: Add the Heroicons *chat-bubble-left-right* (or equivalent from the icon manifest) to the left of the eyebrow. Switch the subtitle from stacked to right-aligned via the same flex-row pattern used on SETUP & ONBOARDING.

LOW

FROM PREVIOUS QA

Team panel subtitle still aggregates everyone as “operators”; should split AMs from operators

Where to see: Top → Clients → client detail → About tab → Team panel header.

Portal: Subtitle reads “No team assigned” when empty; aggregates everyone as “operators” when populated.

Original: Subtitle splits the count: “1 account manager · 1 operator”. Counts AMs separately from operators because the role distinction matters in the team panel. “+ Add operator” button alongside Edit.

Fix: Two changes:

- **Subtitle formatter:** split the team into AMs (where *jobTitle.name* === ‘Account Manager’) and operators (everyone else). Render as {X} account managers · {Y} operators.
- **Add an “+ Add operator”** button next to Edit in the Team panel header.

LOW

NEW

Notes editor timestamp uses Australian format on portal (“12 May 2026, 11:03 pm”); original uses American (“May 12, 2026, 11:04 PM”)

Where to see: Top → Clients → client detail → Notes tab → the timestamp at the top of the editor (above the toolbar).

Portal: Renders “12 May 2026, 11:03 pm” — day-month-year order, lowercase *pm*.

Original: Renders “May 12, 2026, 11:04 PM” — month-day-year order, uppercase *PM*. Matches the rest of the app's timestamp format (Last activity column, Card comments, Weekly WIP captures).

Fix: Swap the Notes editor timestamp formatter to use the same *Intl.DateTimeFormat* options the rest of the app uses (`{month: 'long', day: 'numeric', year: 'numeric', hour: 'numeric', minute: '2-digit'}`). Verify against the shared *formatTimestamp()* helper if one exists; if not, add one so this drift can't happen again on a different surface.

LOW

FROM PREVIOUS QA

List view — Search input still missing the descriptive aria-label

Where to see: Top → Clients → left rail → the search input above the filter tabs.

Portal: *aria-label*=“Search” (one word). Screen-reader users hear “Search” with no context for what the field searches.

Original: *aria-label*=“Search clients by name”. Same pattern used on the Members search and Templates search.

Fix: Update the input's *aria-label* to “Search clients by name”. Match the placeholder where possible.

LOW

FROM PREVIOUS QA

Detail header — Manager avatar button still missing aria-label

Where to see: Top → Clients → client detail → header MANAGER cell → the small avatar next to the MANAGER label.

Portal: Avatar button has no *aria-label*. Screen readers announce only the visible initials (“NT”).

Original: *aria-label*=“Open profile for {manager name}”. Same pattern used on the list row AM avatar.

Fix: Add *aria-label*=“Open profile for {manager.name}” to the avatar button. Same pattern as the list-row AM avatar.

Build checklist

Every actionable finding (HIGH / MED / LOW). INFO items are listed in the body but not in the checklist. Tick each as it ships.

- ☐ **HIGH** **NEEDS ATTENTION still renders a small inline pill instead of two full-width cards**
Replace the inline pill with the two-card slot component. Each card carries:
 - a left-side icon (fire for past-due, chat-bubble for at-risk).
 - a bold count title (“1 card past due” / “1 at risk”).
 - a subtitle that names the service the count relates to + a hint about the action (“tap to open” / “review soon”).
 - a click target that opens the service detail.
- ☐ **HIGH** **Onboarding section labels still read “FROM CLIENT” / “FROM US”; should be “NEEDED FROM CLIENT” / “WE TAKE CARE OF”**
Replace the two label strings in the onboarding checklist component:
 - “FROM CLIENT” → “**NEEDED FROM CLIENT**”.
 - “FROM US” → “**WE TAKE CARE OF**”.Same labels appear on the Add client → Onboarding step modal; keep them consistent there too.
- ☐ **HIGH** **Client header still doesn't render the “Client since” date or a populated MANAGER avatar**
Two fixes:
 - **Render the “Client since” date** from *Client.createdAt* (format “Sep 2024” — month + year). Drop the “—” em-dash placeholder. If somehow the date is missing, hide the whole cell rather than render the dash.
 - **Wire the MANAGER cell** to *Client.amId*. Lookup the user, render avatar + name. Restate the assignment from the About tab → Team panel so the two surfaces stay in sync.
- ☐ **HIGH** **Account-manager assignment from the About tab still doesn't propagate to the header**
The fix is a state-management plumbing issue:
 - Confirm the About-tab AM control writes to the same store key the header reads from (almost certainly *Client.amId*).
 - The header component needs to subscribe to *Client.amId* changes (not just snapshot once on mount).
 - Verify with a manual repro: assign → watch header → should update within the same render cycle. Without a hard refresh.

- ☐ **MED** **List view: last-activity timestamp coverage is still only on a handful of rows**

Two parts:

 - **Data:** ensure every Client row has *updatedAt* populated. If the legacy import didn't backfill it, run a migration that sets *updatedAt* = *createdAt* for rows where it's null.
 - **Render:** switch the format to the weekday-short pattern for the last 7 days, dd Mmm for older. Match the original's *Intl.DateTimeFormat* tokens (the original uses *{weekday: 'short'}* when within the current week).
- ☐ **MED** **Service pill labels carry internal project IDs (“Account Management - 965199”)**

Strip the legacy “[*ClientName*] - [*ServiceName*] - [*ID*]” format down to just [*ServiceName*]. Either:

 - **One-time data clean:** run a migration that splits each *Service.name* on “ - ”, keeps the middle segment, drops the prefix + suffix.
 - Or **render-time strip:** if the legacy name can't be touched, parse it on render and show only the middle segment.

Data clean is the cleaner fix.
- ☐ **MED** **Hero logo tile: still wrong shape, corner radius, and palette**

Three fixes:

 - Lock the tile to *aspect-ratio: 1 / 1* so it's always square.
 - Use the purple-blue gradient palette (matches the avatar gradients on Members and Card assignees).
 - Centre vertically against the title block, not the top of the header.
- ☐ **MED** **Onboarding service card subtitle still says “No items yet” instead of “[Template] · [N] items left”**

Subtitle formatter:

 - Read the linked *Template.name* from the Service → Template ref.
 - Count unchecked items across both sections (NEEDED FROM CLIENT + WE TAKE CARE OF).
 - Render *{template} · {N} items left*. When count is 0, render *{template} · complete*.
- ☐ **MED** **Onboarding checkbox layout still single-column; original uses two-column wrap**

Switch the list container from a single vertically-stacked layout to a *grid-template-columns: 1fr 1fr; gap: 8px 16px* layout (or a flex-wrap equivalent). Keep the + *Add item* affordance at the end, spanning the full row width.
- ☐ **MED** **Quick Links still renders a globe icon for every link type**

Build a simple URL pattern matcher in the Quick Links panel render:

 - *drive.google.com, onedrive.live.com, dropbox.com* → drive icon.
 - *github.com, gitlab.com* → code icon.
 - *figma.com* → design icon.
 - anything else → globe (fallback).

Same matcher pattern the original uses; the icon set is in the icon-manifest doc.

- ☐
- MED
- About tab panel titles use sentence case; should be uppercase eyebrows**
Switch the panel-header component to the eyebrow style class (the same one used by the section headers above the panels). Uppercase the strings in the data (or transform via *text-transform: uppercase*).
- ☐
- MED
- Service-row status pill still uses title case and no leading dot**
In the service-row status pill component: uppercase the label + prefix a coloured bullet (· character or a small dot span) coloured to match the status. Reuse the status-colour map from the Clients list dot indicator.
- ☐
- MED
- Service-row progress: percentage shown but the bar element still missing or invisible**
Add a track element under (or beside) the percentage:
 - Height ~3-4px, full column width.
 - Rounded corners.
 - Neutral grey background (track).
 - Brand-blue fill at *style={ width: `\${pct}%` }*.
 - Render the track even when pct is 0 so the user sees the rail (and the future fill).
- ☐
- MED
- Notes editor toolbar still uses text labels for H2/H3 + bare punctuation for lists**
Replace the four text/character buttons with the matching SVG icons. Use Heroicons *list-bullet*, *numbered-list*, and the heading-2 / heading-3 SVGs from the icon manifest. Same toolbar component the Weekly WIP page already ships.
- ☐
- LOW
- Status indicator dot in the Clients list still has no hover tooltip**
Set both *title* and *aria-label* on each dot to the original's exact strings (see the four above). Same strings, same hyphen format. Verify with VoiceOver/NVDA that the label is announced.
- ☐
- LOW
- Section header timestamp still clusters left next to the eyebrow instead of right-aligning**
Wrap the section header in a flex row, push the timestamp to the right with *margin-left: auto* (or *justify-content: space-between* on the parent). The eyebrow stays anchored left; the timestamp anchors right.
- ☐
- LOW
- Timestamp copy still reads “As of today”; should be “As of this morning”**
One-string change: “As of today” → “As of this morning”.
- ☐
- LOW
- Service-row favourite star still renders as thin outline with no visible active state**
Swap the toggled-on star to a filled gold star (Heroicons *star* solid variant, *fill="#FACC15"*). Keep the outline variant for the toggled-off state. Hover state on toggled-off can preview the filled version at 50% opacity.

- ☐
- LOW
- RELATIONSHIP section header still missing the chat-bubble icon + subtitle stacking**
Add the Heroicons *chat-bubble-left-right* (or equivalent from the icon manifest) to the left of the eyebrow. Switch the subtitle from stacked to right-aligned via the same flex-row pattern used on SETUP & ONBOARDING.
- ☐
- LOW
- Team panel subtitle still aggregates everyone as “operators”; should split AMs from operators**
Two changes:
 - **Subtitle formatter:** split the team into AMs (where *jobTitle.name* === 'Account Manager') and operators (everyone else). Render as {X} account managers · {Y} operators.
 - **Add an “+ Add operator”** button next to Edit in the Team panel header.
- ☐
- LOW
- Notes editor timestamp uses Australian format on portal (“12 May 2026, 11:03 pm”); original uses American (“May 12, 2026, 11:04 PM”)**
Swap the Notes editor timestamp formatter to use the same *Intl.DateTimeFormat* options the rest of the app uses (*{month: 'long', day: 'numeric', year: 'numeric', hour: 'numeric', minute: '2-digit'}*). Verify against the shared *formatTimestamp()* helper if one exists; if not, add one so this drift can't happen again on a different surface.
- ☐
- LOW
- List view — Search input still missing the descriptive aria-label**
Update the input's aria-label to “*Search clients by name*”. Match the placeholder where possible.
- ☐
- LOW
- Detail header — Manager avatar button still missing aria-label**
Add *aria-label=“Open profile for {manager.name}”* to the avatar button. Same pattern as the list-row AM avatar.
