

PORTAL QA · ROUND 5

Home page audit

May 14, 2026

Round 5 verification of the Home page. Dev claimed all R4 items shipped — live check confirms **6 of 9 R4 findings fully closed** (R4 #1 + #4 + MY BOARDS section icons all migrated to Heroicons; R4 #2 + #8 MY TASKS click target + aria-label now point at the card; R4 #5 day-card kebab is now the cap-setting popover; R4 #7 + #9 tooltips audit matches). **2 R4 items remain partially open** — MY TASKS left-edge bar exists but always renders grey instead of severity-coloured; pinned-card subtitle still shows the ALLCAPS legal entity name without the “· Service Type” pill. Fresh sweep surfaces **3 new deviations**: Portfolio Health card icons still use Lucide while the section header migrated to Heroicons; MY TASKS card subtitle is missing the *Blocked: / Opens:* prefix pattern; the day-card cap-edit kebab is always visible instead of hover-only. 5 findings open total, sorted HIGH → LOW. Triage **FROM PREVIOUS QA** chips first.

5 findings · 0 HIGH · 2 MED · 3 LOW · 0 INFO

Status legend: **HIGH** blocks scanning / breaks workflow · **MED** meaningful divergence · **LOW** polish · **INFO** matches or working as intended.

Each finding carries two chips. **Severity** (HIGH / MED / LOW / INFO) maps to impact. **History tag** (**FROM PREVIOUS QA** = carried over from prior QA, **NEW** = surfaced this round) shows which items the dev has been sitting on vs. fresh observations. **FROM PREVIOUS QA** items need triage first.

MED

NEW

Portfolio Health card icons (flame, triangle-alert, circle-check) still use Lucide; section header icons were migrated to Heroicons but the cards beneath weren't

Where to see: Top → Home → PORTFOLIO HEALTH section → the three cards (ON FIRE, AT RISK, ON TRACK) → the small rounded-square icon to the left of each number.

Portal: Each card icon carries a *lucide*-* class:

- ON FIRE → *lucide lucide-flame* (Lucide flame).
- AT RISK → *lucide lucide-triangle-alert*.
- ON TRACK → *lucide lucide-circle-check-big*.

Section-header icons (PORTFOLIO HEALTH heart, MY TASKS bell, MY SCHEDULE calendar, MY BOARDS kanban-columns) all shipped on Heroicons after R4. The Portfolio Health card icons are the last Lucide hold-outs inside this surface.

Original: Each card icon uses a Heroicons SVG with the characteristic stroke-width 1.5 + aria-hidden=true + data-slot=icon signature:

- ON FIRE → Heroicons *fire* (M15.362 5.214A8.252 8.252 0 0 1 12 21 8.25 8.25 0 0 1 6.038...).
- AT RISK → Heroicons *exclamation-triangle*.
- ON TRACK → Heroicons *check-circle*.

Same library as the section-header icons; consistent stroke-width across the page.

Fix: Replace the three Lucide imports in the Portfolio Health card component with the matching Heroicons outline icons:

- *flame* → *FireIcon* from `@heroicons/react/24/outline`.
- *triangle-alert* → *ExclamationTriangleIcon*.
- *circle-check-big* → *CheckCircleIcon*.

While there, audit the file for any remaining *lucide-react* imports inside the Home page tree and remove them. The whole page should be Heroicons-only after this.

MED

NEW

MY TASKS card subtitle missing the "Blocked:" / "Opens:" prefix pattern

Where to see: Top → Home → MY TASKS section → the subtitle line under the bold count ("11 overdue · 1 blocked" / "2 overdue cards").

Portal: Subtitle renders the raw next-task title with no prefix:

- AT RISK Acme Corp → subtitle "Review prospect's website copy & messaging".

User has to read the whole line to figure out what it's telling them. No quick scan.

Original: Subtitle prefixes the context word so the line reads as a sentence:

- ON FIRE Acme Corporation → "**Blocked:** Budget approval stalled".
- AT RISK Northshore Legal → "**Opens:** Schema markup for pricing page".

ON FIRE cards get "Blocked: [reason]" because the action item is the blocker. AT RISK cards get "Opens: [next task]" because the action item is the next task to pick up. Same shape, different word.

Fix: Update the subtitle renderer in the MY TASKS card component. Switch on card severity:

- **ON FIRE** → prefix *Blocked:* + the blocker reason.
- **AT RISK** → prefix *Opens:* + the next task title.

If the card is AT RISK but has a blocker too, use Blocked. The prefix is the bold word; the rest is normal weight.

LOW severity

LOW

FROM PREVIOUS QA

MY TASKS card left-edge bar shipped but always renders gray; doesn't map to severity colour

Where to see: Top → Home → MY TASKS card → the 3px coloured bar on the far-left edge (*::before* pseudo-element on *.attn-card*).

Portal: R4 #3 partial fix:

- **Bar element exists** — *::before* renders at 3px width on the left edge. ✓
- **Colour is wrong** — fill is *rgb(168, 168, 173)* (neutral grey) regardless of severity.

The AT RISK card on the portal renders grey instead of the amber it would be on the original. ON FIRE cards (if any rendered) would also be grey instead of red.

Original: Bar colour maps to *.attn-card.critical* / *.attn-card.warn* CSS classes:

- **.critical** (ON FIRE) → *rgb(255, 69, 58)* (red).
- **.warn** (AT RISK) → amber/orange.

The bar carries the same severity signal as the pill at the top of the card; a glance at the row edge tells you the priority without reading.

Fix: In the *.attn-card::before* rule, key the background colour off the modifier class:

- *.attn-card.critical::before* → *background: var(--severity-critical, #FF453A)*.
- *.attn-card.warn::before* → *background: var(--severity-warn, #FF9F0A)*.

Drop the always-grey default. Verify across both card states by populating one of each on the test workspace.

LOW

FROM PREVIOUS QA

MY BOARDS pinned card subtitle still wrong — shows ALLCAPS company name without the “· Service Type” pill

Where to see: Top → Home → MY BOARDS section → the bottom line of each pinned card (under the bold title).

Portal: R4 #6 partial fix:

- **Title is clean now** — no internal project IDs in the title. ✓
- **Health bar exists** — green/red ::before edge bar renders. ✓
- **Subtitle is wrong** — renders the full ALLCAPS legal entity name (“ALLIED PERFORMANCE PTY LTD T/A Fuel Your Life”) truncated to fit. No service-type indicator.

Original: Subtitle is two pieces separated by a middle dot:

- **Company name** in regular case (“Acme Corporation”).
- **· Service-type pill** in muted gray (“Project”, “Retainer”).

Two signals at a glance — who the work is for, and what kind of engagement it is. The pill is the same atom used on the service-row chips inside the client detail.

Fix: Replace the legal-entity name lookup with the display name (Title Case, no “PTY LTD T/A” suffix). Append “·” + the service-type pill component. Same pattern used on the client list row.

Strip the ALLCAPS legal entity name back to the human-readable label the user knows the client by — either the trading-as name or the short name on the Client record.

LOW

NEW

Day-card cap-edit kebab is always visible on portal; original hides until hover

Where to see: Top → Home → MY SCHEDULE section → each day card header → the kebab (⋮) to the right of the load badge (e.g. “1/6”). Mouse OUT of the card and look at the kebab visibility.

Portal: `.week-col-cap-edit` renders the kebab (“⋮”) on every day card at full opacity at rest. Pulls visual attention to a control most users will never touch (cap setting is rare).

Original: Same element, hidden until hover or keyboard focus on hover-capable devices. Touch users always see it.

CSS pattern:

```
@media (hover: hover) {  
  .day-card .cap-edit { opacity: 0; pointer-events: none; }  
  .day-card:hover .cap-edit,  
  .day-card:focus-within .cap-edit { opacity: 1; pointer-events: auto; }  
}
```

Fix: Apply the hover-only visibility CSS above to `.week-col-cap-edit`. Scope the hide to `@media (hover: hover)` so touch users always see it. Also keep visible while the popover the kebab opens is itself open (so the trigger doesn't vanish out from under the popover).

Build checklist

Every actionable finding (HIGH / MED / LOW). INFO items are listed in the body but not in the checklist. Tick each as it ships.

- ☐

MED

Portfolio Health card icons (flame, triangle-alert, circle-check) still use Lucide; section header icons were migrated to Heroicons but the cards beneath weren't

Replace the three Lucide imports in the Portfolio Health card component with the matching Heroicons outline icons:

- *flame* → *FireIcon* from `@heroicons/react/24/outline`.
- *triangle-alert* → *ExclamationTriangleIcon*.
- *circle-check-big* → *CheckCircleIcon*.

While there, audit the file for any remaining *lucide-react* imports inside the Home page tree and remove them. The whole page should be Heroicons-only after this.

- ☐

MED

MY TASKS card subtitle missing the "Blocked:" / "Opens:" prefix pattern

Update the subtitle renderer in the MY TASKS card component. Switch on card severity:

- **ON FIRE** → prefix *Blocked:* + the blocker reason.
- **AT RISK** → prefix *Opens:* + the next task title.

If the card is AT RISK but has a blocker too, use *Blocked*. The prefix is the bold word; the rest is normal weight.

- ☐

LOW

MY TASKS card left-edge bar shipped but always renders gray; doesn't map to severity colour

In the `.attn-card::before` rule, key the background colour off the modifier class:

- `.attn-card.critical::before` → `background: var(--severity-critical, #FF453A)`.
- `.attn-card.warn::before` → `background: var(--severity-warn, #FF9F0A)`.

Drop the always-grey default. Verify across both card states by populating one of each on the test workspace.

- ☐

LOW

MY BOARDS pinned card subtitle still wrong — shows ALLCAPS company name without the “· Service Type” pill

Replace the legal-entity name lookup with the display name (Title Case, no “PTY LTD T/A” suffix). Append “·” + the service-type pill component. Same pattern used on the client list row.

Strip the ALLCAPS legal entity name back to the human-readable label the user knows the client by — either the trading-as name or the short name on the Client record.

LOW

Day-card cap-edit kebab is always visible on portal; original hides until hover

Apply the hover-only visibility CSS above to *.week-col-cap-edit*. Scope the hide to *@media (hover: hover)* so touch users always see it. Also keep visible while the popover the kebab opens is itself open (so the trigger doesn't vanish out from under the popover).
