

PORTAL QA · ROUND 1

Workflow 8 · Account settings audit

May 15, 2026

Workflow 8 of 10 in the May 15 deep-testing pass. Walked the Account Settings modal: opened from the avatar dropdown, confirmed sidebar shell, inspected Profile + Members + Trash. Time-off subsection covered separately in Workflow 4.

One HIGH — Trash is empty despite Workflow 1's failed Delete attempts on TEST CLIENT 1. Confirms the portal Delete is a no-op at the data layer: doesn't soft-delete to Trash, doesn't hard-delete. Same bug surfaced from a different angle.

Modal sidebar shape + Members + Trash empty-state copy all match spec. Many of the prior Account R2 findings weren't re-verified individually in this pass; this workflow's scope was the structural integrity of the sidebar + the cross-reference with the broken-delete bug. A separate Account R3 round can sweep the remaining R2 findings once the dev signals they're ready.

4 findings.

4 findings · 1 HIGH · 0 MED · 0 LOW · 3 INFO

Status legend: **HIGH** blocks scanning / breaks workflow · **MED** meaningful divergence · **LOW** polish · **INFO** matches or working as intended.

Each finding carries two chips. **Severity** (HIGH / MED / LOW / INFO) maps to impact. **History tag** (**FROM PREVIOUS QA** = carried over from prior QA, **NEW** = surfaced this round) shows which items the dev has been sitting on vs. fresh observations. **FROM PREVIOUS QA** items need triage first.

Functional · HIGH severity

HIGH**FROM PREVIOUS QA**

Trash is empty despite the broken Delete flow (TEST CLIENT remains in Archived) — confirms portal hard-fails delete on archived clients

Where to see: Account settings → Trash. Also see Workflow 1 finding for the Delete-doesn't-work bug.

Portal: Trash renders the subtitle *"Recently deleted items across the workspace. Items are permanently removed after 90 days."* and an empty-state placeholder reading *"Workspace trash is empty / Deleted templates, notes, and archived items across the workspace will appear here."*

Cross-reference with Workflow 1: I clicked Delete on TEST CLIENT 1 - MAY 15 QA twice from the Archived bucket. The client stayed in Archived (count never decremented). Trash is empty. So delete **neither soft-deletes to Trash nor hard-deletes** — the click is a no-op at the data layer despite the confirmation dialog firing.

Restates the Workflow 1 finding from the Trash side. Same underlying bug; additional confirmation that the recovery path is unreachable.

Original: Delete soft-deletes to Trash. The user sees the deleted entity inside Account → Trash with a Restore button and a 90-day countdown. After 90 days the entity hard-deletes via auto-prune.

Fix: Same fix as Workflow 1 HIGH #1. Wire the Delete click handler to write the client to `data.trash[]` (or whatever the portal's trash collection is named) and remove from the Archived list. Verify the entity then renders on this Trash page with a Restore affordance.

Functional · INFO severity (verified working)

INFO

NEW

Verified working: Account Settings modal sidebar matches the spec

Where to see: Avatar → Account settings.

Portal: Sidebar renders three groups:

- **MY ACCOUNT:** Profile, Preferences, Notifications, Time off.
- **WORKSPACE:** Members, Job titles, Holidays, Trash.
- **ACCOUNT:** Sign-in.

Matches the CLAUDE.md spec for the modal.

Original: Same.

Fix: None. Sidebar shell working.

INFO

NEW

Verified working: Members page renders the workspace roster

Where to see: Account → Members.

Portal: Header reads *MEMBERS* · 36 with a search input below. List shows members with avatar + name + email on the left side, ADMIN tier pill where applicable, and a role / job-title string on the right (e.g. "SEO Specialist", "Managing Director", "Team Member", "Google Ads Specialist"). Members without an ADMIN tier pill default to member tier (not explicitly shown).

Original: Same with explicit tier pills for every member.

Fix: Optional polish: show tier pills for every member explicitly (not just ADMIN). Otherwise working.

INFO

NEW

Verified working: Trash page renders the 90-day retention copy + empty state

Where to see: Account → Trash.

Portal: Subtitle reads *"Recently deleted items across the workspace. Items are permanently removed after 90 days."* matching the soft-delete spec. Empty state placeholder below.

Original: Same.

Fix: None for the page itself. Underlying delete bug is the issue (see HIGH).

Build checklist

Every actionable finding (HIGH / MED / LOW). INFO items are listed in the body but not in the checklist. Tick each as it ships.

**HIGH****Trash is empty despite the broken Delete flow (TEST CLIENT remains in Archived) — confirms portal hard-fails delete on archived clients**

Same fix as Workflow 1 HIGH #1. Wire the Delete click handler to write the client to `data.trash[]` (or whatever the portal's trash collection is named) and remove from the Archived list. Verify the entity then renders on this Trash page with a Restore affordance.
