

PORTAL QA · ROUND 2

Clients page status update

Round 2 status against the Round 1 punch list. Big lift on this surface: 7 items done, 6 partial, 4 still open, 1 not verified. The detail-page header (status pill, metadata strip) and the Overview tab Needs Attention section are the three biggest gaps left.

Round 1 items: **7** done · **6** partial · **4** open · **1** not verified

Status legend: **DONE** shipped · **PARTIAL** partly shipped · **OPEN** still missing · **NO ACTION** acceptable.

This document is interactive. The build checklist on the last page lists every item still open. Click each checkbox as the dev ships it, then save the PDF.

Round 1 items: status update

Each Round 1 item walked through with what shipped vs what's still missing. Items marked OPEN or PARTIAL roll up into the build checklist at the end.

HIGH **DONE** #1. Filter tabs missing: Assigned to me, Archived

Round 1: Six filter chips (missing Assigned to me, Archived).

Round 2: All 8 chips now present: All / Assigned to me / On Fire / At Risk / On Track / Onboarding / Paused / Archived. Done.

HIGH **PARTIAL** #2. Client row content: industry, service tags, last-active timestamp

Round 1: Each row missing industry / service tags / last-active timestamp.

Round 2: Service tag chips now show on each row (Google Ads, Meta Ads, etc.). Industry label and last-active timestamp still missing.

What's left: Add the industry/segment label under the client name. Add a right-aligned last-active timestamp pulled from the most recent activity on any of the client's services.

HIGH **OPEN** #3. Status pill on the header card

Round 1: Detail-page header missing the STATUS: ON FIRE / AT RISK / etc. pill.

Round 2: Header still shows just the avatar + name. No status pill.

What's left: Surface the client status (on-fire / at-risk / on-track / onboarding / paused / archived) as a labeled pill next to the client name. Match the dot color from the list view.

HIGH **OPEN** #4. Header metadata strip (industry, manager, client-since)

Round 1: Three-item metadata strip below the client name: industry / manager / client-since.

Round 2: Still no metadata strip. Header is just avatar + name.

What's left: Add the strip with three items separated by middle dots: industry icon + text, manager icon + avatar chip + name, calendar icon + "Client since Mon YYYY".

MED **DONE** #5. Kebab menu (Archive / Delete) on the header card

Round 1: No kebab menu top-right of header.

Round 2: 3-dot kebab now visible on the right side of the header card. Done.

HIGH **OPEN** #6. Needs Attention section (top of Overview tab)

Round 1: Two-card row at the top of Overview surfacing "X cards past due" + "Y at risk".

Round 2: Overview tab still opens directly into Active Services. No Needs Attention row.

What's left: Add the Needs Attention row as the first block under the tabs. Aggregate counts of past-due and at-risk cards across all of the client's services. Each card tappable into the relevant board.

MED PARTIAL #7. Active Services count breakdown

Round 1: Header text "X of Y active" with no project/retainer breakdown.

Round 2: Portal now shows "5 of 5 active". The active-vs-total count is in. The project/retainer split is still missing.

What's left: Append the breakdown to the count line: "5 of 5 active · N projects, M retainers". Source from the service.type field per service.

HIGH DONE #8. Active Services: Edit and + Add service buttons

Round 1: No Edit or + Add service buttons on the Active Services header.

Round 2: Both buttons now visible on the right side of the Active Services header. Done.

MED DONE #9. Service card layout (list with progress bar vs grid with badges)

Round 1: 3-column grid layout with compact cards.

Round 2: Portal now uses the vertical list layout: name + Active + status badges + task count + percentage + progress bar inline on the right. Star icon at the right edge of each row. Done.

HIGH DONE #10. Service card star (favorite for My Boards)

Round 1: No star icon on service cards.

Round 2: Star icon now visible at the right edge of each service row. Toggling adds the service to the user's favorites for the My Boards section on Home. Done.

MED OPEN #11. Onboarding tab top progress count

Round 1: "X of Y services in progress · A of B items complete" right-aligned in the Setup & Onboarding header.

Round 2: Setup & Onboarding header still has no progress summary on the right.

What's left: Add the right-aligned progress line. Compute services-in-progress (where at least one item is checked but not all) and total items complete across all services.

MED OPEN #12. Onboarding per-service progress bar + items-left badge

Round 1: Each service block has "X items left" inline + "X/Y" count chip + progress bar.

Round 2: Portal still shows just "No items yet" with a collapse arrow. No progress bar even when populated. Likely partly data-state (no items in portal data). Verify with a populated client.

What's left: Surface the X/Y count chip and progress bar on each service block. "X items left" inline next to the name. Bar fill driven by checked-items / total-items.

HIGH PARTIAL #13. About tab: Edit and + Add contact buttons on Client Contacts

Round 1: No Edit or + Add contact buttons on the section header.

Round 2: + Add contact button now visible. Edit button still missing.

What's left: Add the Edit button next to + Add contact. Should open the contacts list in edit mode (rename, change role, mark primary, delete).

HIGH PARTIAL #14. About tab: Edit and + Add link buttons on Quick Links

Round 1: No Edit or + Add link buttons.

Round 2: + Add link button now visible. Edit button still missing.

What's left: Add the Edit button next to + Add link. Should let the user rename, reorder, or remove existing links.

MED PARTIAL #15. Contact card detail (role + quick actions)

Round 1: Each contact row shows email under name with no role title and no quick-action icons.

Round 2: Mail icon now shows on the right of each contact row. Role title under name still missing (still showing email). Primary-contact star also still missing.

What's left: Show the role title ("Head of Demand Gen" etc.) on the second line instead of email. Add a star next to the name for the primary contact. Phone icon (when phone is available) alongside the mail icon.

MED OPEN #16. Team section: Edit + Add operator buttons

Round 1: Team header missing breakdown count + Edit + Add operator buttons.

Round 2: Team header still reads just "8 operators". No breakdown count ("X account manager · Y operators"), no Edit/Add buttons. "None assigned yet" empty state still under ACCOUNT MANAGER even though operators are listed below in PROJECT TEAM.

What's left: Add the breakdown count to the right of the Team header. Add Edit + Add operator buttons. Reconcile the ACCOUNT MANAGER empty state. If any operator on the project is the assigned manager, surface them there instead of "None assigned yet".

LOW DONE #17. About tab: header eyebrow + tagline

Round 1: No eyebrow or tagline above the columns.

Round 2: Portal now shows the RELATIONSHIP eyebrow + "Who we talk to, and where to find their stuff" tagline. Done.

MED NO ACTION #18. Brief modal (verify on board page)

Round 1: Wasn't fully verified during Round 1; flagged for the dev to confirm.

Round 2: Not verified during this Round 2 audit either; the Brief lives on the board page, not the client surface. Carry forward as an item to confirm separately. No status change.

What's left: Open any service's board page in the portal and confirm the Project Brief button + modal exist. If absent, port from the dev build.

Build checklist

Every still-open and partial item from above. Tick each as it ships.

- ☐ **HIGH** **#2. Client row content: industry, service tags, last-active timestamp**
 Add the industry/segment label under the client name. Add a right-aligned last-active timestamp pulled from the most recent activity on any of the client's services.
- ☐ **HIGH** **#3. Status pill on the header card**
 Surface the client status (on-fire / at-risk / on-track / onboarding / paused / archived) as a labeled pill next to the client name. Match the dot color from the list view.
- ☐ **HIGH** **#4. Header metadata strip (industry, manager, client-since)**
 Add the strip with three items separated by middle dots: industry icon + text, manager icon + avatar chip + name, calendar icon + "Client since Mon YYYY".
- ☐ **HIGH** **#6. Needs Attention section (top of Overview tab)**
 Add the Needs Attention row as the first block under the tabs. Aggregate counts of past-due and at-risk cards across all of the client's services. Each card tappable into the relevant board.
- ☐ **MED** **#7. Active Services count breakdown**
 Append the breakdown to the count line: "5 of 5 active · N projects, M retainers". Source from the service.type field per service.
- ☐ **MED** **#11. Onboarding tab top progress count**
 Add the right-aligned progress line. Compute services-in-progress (where at least one item is checked but not all) and total items complete across all services.
- ☐ **MED** **#12. Onboarding per-service progress bar + items-left badge**
 Surface the X/Y count chip and progress bar on each service block. "X items left" inline next to the name. Bar fill driven by checked-items / total-items.
- ☐ **HIGH** **#13. About tab: Edit and + Add contact buttons on Client Contacts**
 Add the Edit button next to + Add contact. Should open the contacts list in edit mode (rename, change role, mark primary, delete).
- ☐ **HIGH** **#14. About tab: Edit and + Add link buttons on Quick Links**
 Add the Edit button next to + Add link. Should let the user rename, reorder, or remove existing links.
- ☐ **MED** **#15. Contact card detail (role + quick actions)**
 Show the role title ("Head of Demand Gen" etc.) on the second line instead of email. Add a star next to the name for the primary contact. Phone icon (when phone is available) alongside the mail icon.
- ☐ **MED** **#16. Team section: Edit + Add operator buttons**
 Add the breakdown count to the right of the Team header. Add Edit + Add operator buttons. Reconcile the ACCOUNT MANAGER empty state. If any operator on the project is the assigned manager, surface them there instead of "None assigned yet".
