

PORTAL QA · ROUND 4

Analytics page regression check + status update

Round 4 status: 2 fixes (workload now shows job titles, KPI drill title em dash gone). 1 still open: the Team workload row chevron toggles state but renders no drill-down panel. This was tracked since round 2; the chevron control implies a drill-down feature that still isn't wired up.

Round 4: **2** done · **1** open

Status legend: **DONE** shipped this round · **STILL DONE** shipped earlier, still working · **PARTIAL** partly shipped · **OPEN** still missing · **NO ACTION** acceptable.

This document is interactive. The build checklist on the last page lists every item still open. Click each checkbox as the dev ships it, then save the PDF.

Still open

What still needs work. Items tagged **[NEW]** surfaced fresh in round 4 (and weren't on the round 2 or round 3 lists).

HIGH

OPEN

#2. Team workload row chevron toggles state but renders no drill-down

Where it stood: Round 2 #3: each Team workload row has a chevron on the right that toggles aria-expanded between "true" and "false" but no panel renders below. The control implies a drill-down feature that isn't wired up.

Round 4 status: No change. Verified on Harvey San Juan (589 tasks): hovering shows the chevron, clicking flips its direction (down to right), aria-expanded toggles, but nothing renders underneath the row. Same behavior across all rows.

What's left: Either wire up the expansion panel or remove the chevron until the panel is ready. Wiring the panel: render the member's open tasks underneath the row when expanded, grouped by client · service, with status pill, due date, and a link to open the card. Limit to 10 with a "see all 589" link. Pulling the chevron: drop the button entirely so the affordance doesn't lie about what's behind it.

Done

Items shipped (this round or earlier) and still working. Listed for the record so we agree on what closed.

LOW

DONE

#1. Team workload now shows job titles, not access roles

Where it stood: Round 2 #2: Team workload subtitle column showed access roles (team_member, seo_specialist, manager) instead of richer job titles.

Round 4 status: Each member now shows a real job title: Harvey San Juan / Web Designer, Steven Pythas / Strategic Account Director / SEM Manager, Chris Castellano / Senior Growth Manager & SEO Manager, Catherine Pequino / MLOps Engineer / AI Application Developer, etc. Same fix shows up on Client > About > Project Team and the Home Delegate popover.

LOW

DONE

#3. KPI drill title em dash replaced with colon

Where it stood: Round 3 wiring W9: On-time rate drill title read "Closed tasks — on time vs. late" with a literal em dash. Violated the no-em-dash copy rule.

Round 4 status: Title now reads "Closed tasks: on time vs. late" (colon, no em dash). Done.
