

PORTAL QA · ROUND 4 (DEEP)

Analytics page deep audit

Round 4 deep audit. Two fixes shipped (workload job titles, drill title em dash). One HIGH still open: workload row chevron expansion is wired but renders no panel. KPI shape matches; drill-down format matches; filter pill content matches. Mostly aligned at the page surface.

Round 4 deep findings: **2** done · **1** open · **9** fyi

Status legend: **DONE** shipped · **OPEN** needs work · **NO ACTION** acceptable.

This document is interactive. Build checklist on the last page lists every still-open item. Tick each as it ships, save the PDF.

Still open

Each entry: where it stood (lineage from previous rounds), round 4 status, and what's left.

HIGH OPEN #2. Team workload row chevron toggles state but renders no drill-down

Where it stood: Round 2 #3.

Round 4 status: Chevron appears on row hover. Click flips direction (down → right) and toggles aria-expanded. No panel renders below the row. Drill-down is not wired.

What's left: Either wire the panel (member's open tasks underneath, grouped by client · service, with status pill, due date, and link to open card; cap at 10 with "see all" link) or pull the chevron entirely so the affordance doesn't lie.

Done

Items shipped (this round or earlier) and still working.

LOW DONE #1. Team workload now shows job titles

Where it stood: Round 2 #2.

Round 4 status: Each member row shows a real job title (Web Designer, Strategic Account Director / SEM Manager, Senior Growth Manager & SEO Manager, MLOps Engineer / AI Application Developer, etc.). Done.

LOW DONE #3. KPI drill title em dash replaced with colon

Where it stood: Round 3 W9.

Round 4 status: "Closed tasks: on time vs. late" reads with colon. Done.

For your awareness

No-action items. Context only.

INFO NO ACTION #4. Header eyebrow + h1 + subtitle

Where it stood: Round 1.

Round 4 status: "ANALYTICS" eyebrow + "Delivery health" h1 + "Where to look when something feels off." subtitle. Match.

INFO NO ACTION

#5. Filter pills: Anyone / All projects / date window**Where it stood:** Round 1.**Round 4 status:** All three pills render correctly. Date window: 4 options match (Overdue + next 7 days, +30, +90, All time).

INFO NO ACTION

#6. KPI cards: 4 cards with correct structure**Where it stood:** Round 1 + audit pulls.**Round 4 status:** ON-TIME RATE / BLOCKED NOW / DUE NEXT 7 DAYS / CLIENTS FLAGGED. Eyebrow + main value + unit + foot text. Match.

INFO NO ACTION

#7. KPI foot text format matches**Where it stood:** Round 1 + analytics-computations spec.**Round 4 status:** "X closed in window · Y on time" / "Oldest: N days" / "X already overdue" / clients listed with middot separator. Match.

INFO NO ACTION

#8. Upcoming deliverables sub-tabs with counts**Where it stood:** Round 1.**Round 4 status:** Today / This week / Next week sub-tabs with counts. Each row: overdue indicator + day-of-week + title + subtitle + assignee + status pill + chevron. Match.

INFO NO ACTION

#9. Drill-down panel layout + close**Where it stood:** Round 1.**Round 4 status:** X close button + drill list with same row format as Upcoming deliverables. Match.

LOW NO ACTION

#10. Reset filters link not deep-verified**Where it stood:** Not previously documented.**Round 4 status:** Ours surfaces a "Reset filters" link when any filter is dirty. Need to verify portal has the same affordance after toggling filters.**What's left:** Verify on next pass.

LOW NO ACTION

#11. Filter pill active state visual**Where it stood:** Not previously documented.**Round 4 status:** Ours uses tier-3 blue tint background when a filter is non-default. Portal not deep-verified.**What's left:** Verify on next pass.

INFO

NO ACTION

#12. Cross-page note on role-formatting fix

Where it stood: Round 4 cross-cutting.

Round 4 status: The job-title fix on Analytics workload propagated to Client About > Project Team and Home Delegate popover. Did NOT propagate to Ops > Time off Schedules role chips (documented under Ops findings).

What's left: Apply same fix on Ops > Time off Schedules.
