

PORTAL QA · ROUND 4 (DEEP)

TopNav deep audit

Round 4 deep audit. Top-of-page nav surface visible on every page. Mostly aligned; one MED gap (theme toggle missing from avatar dropdown, forces a 3-click path to switch theme) and two LOW polish nits (active state visibility, brand wordmark naming).

Round 4 deep findings: **0** done · **4** open · **1** fyi

Status legend: **DONE** shipped · **OPEN** needs work · **NO ACTION** acceptable.

This document is interactive. Build checklist on the last page lists every still-open item. Tick each as it ships, save the PDF.

Still open

Each entry: where it stood (lineage from previous rounds), round 4 status, and what's left.

LOW OPEN #1. Brand wordmark text differs

Where it stood: Not flagged previously.

Round 4 status: Portal wordmark reads "Projects V2"; ours reads "Projects". Minor naming inconsistency at the brand surface.

What's left: Match the wordmark to the live reference. Decide whether "V2" stays as a marker or gets dropped.

MED OPEN #3. Active nav state is barely visible

Where it stood: Not flagged previously.

Round 4 status: Portal renders the active link with bold weight only. Ours adds a darker pill background + bold so the selection signal lands. The portal's pressed state is hard to read at a glance.

What's left: Apply the tier-3 blue tint background to the active nav link. Same treatment as our build's pill style.

MED OPEN #4. Theme toggle missing from avatar dropdown

Where it stood: Not flagged previously.

Round 4 status: Our avatar dropdown has identity block + Account settings + "Light theme" / "Dark theme" toggle (sun/moon icon, one-click switch) + Sign out. Portal's dropdown has only identity + Account settings + Sign out. Theme switch on portal requires 3 clicks (avatar → Account settings → Preferences → toggle).

What's left: Add the theme toggle item to the avatar dropdown between Account settings and Sign out. Reuse the icon and label from our build.

LOW OPEN #5. Search popup behavior not deep-tested

Where it stood: Out of scope per user ("dev still working on global search").

Round 4 status: ■K search trigger renders + shortcut hint chip. Popup behavior not deep-tested as the dev is still building this surface. Flagging for future verification once it's ready.

What's left: Once the dev ships the search popup, verify it matches our build's command palette: scoped sections (Clients, Tasks, People), keyboard navigation, recent items, ■K bind to focus, Escape to close.

For your awareness

No-action items. Context only.

LOW

NO ACTION

#2. Back arrow at far left of TopNav

Where it stood: Round 1: noted as acceptable ("links back to outer 121 Group portal, no action needed").

Round 4 status: Still rendered. Acceptable per round 1. Listed for the record.

Build checklist

Every still-open item from above. Tick each as it ships.

- ☐ **LOW** **#1. Brand wordmark text differs**
Match the wordmark to the live reference. Decide whether "V2" stays as a marker or gets dropped.
- ☐ **MED** **#3. Active nav state is barely visible**
Apply the tier-3 blue tint background to the active nav link. Same treatment as our build's pill style.
- ☐ **MED** **#4. Theme toggle missing from avatar dropdown**
Add the theme toggle item to the avatar dropdown between Account settings and Sign out. Reuse the icon and label from our build.
- ☐ **LOW** **#5. Search popup behavior not deep-tested**
Once the dev ships the search popup, verify it matches our build's command palette: scoped sections (Clients, Tasks, People), keyboard navigation, recent items, **■**K bind to focus, Escape to close.
