

PORTAL QA · ROUND 1

Workflow 7 · Templates audit

May 15, 2026

Workflow 7 of 10 in the May 15 deep-testing pass. Tested the Templates page on the portal: inspected the sidebar, opened a Custom and a built-in (Account Management) template, verified header layout, the "Click any field to edit" pill, RESET TO DEFAULT availability, and the create/seed flow exercised in Workflow 2.

Mostly clean. Six R6 / R5 / add-service R1 findings verified shipped (template header rebuild, sidebar pill removal, hint pill colour, RESET TO DEFAULT on built-ins, + New template + Add phase, template seed cards on create). One LOW remains: Custom-template PHASES prompt copy still drifts from the original's italic prose.

Templates page is in the strongest shape of any surface tested this round — almost all open findings closed.

6 findings · 0 HIGH · 0 MED · 1 LOW · 5 INFO

Status legend: **HIGH** blocks scanning / breaks workflow · **MED** meaningful divergence · **LOW** polish · **INFO** matches or working as intended.

Each finding carries two chips. **Severity** (HIGH / MED / LOW / INFO) maps to impact. **History tag** (**FROM PREVIOUS QA** = carried over from prior QA, **NEW** = surfaced this round) shows which items the dev has been sitting on vs. fresh observations. **FROM PREVIOUS QA** items need triage first.

Functional · LOW severity

LOW

FROM PREVIOUS QA

Custom template PHASES prompt still reads "Phases will appear as cards on the board." instead of the source's italic "Describe how this template's phases are paced"

Where to see: Top → Templates → click any Custom ("New template") entry in the sidebar → read the prompt next to the PHASES eyebrow.

Portal: Renders *"Phases will appear as cards on the board."* in regular (non-italic) weight. Same finding as Templates R6 LOW #5. The built-in Account Management template renders *"Ongoing client relationship tasks, recurring monthly"* in the same slot (template-specific copy, regular weight).

Original: Italic *"Describe how this template's phases are paced"* for Custom templates. Template-specific subtitle for built-ins.

Fix: Update the default PHASES subtitle on Custom templates to match the source italic copy. Same fix as Templates R6 LOW #5 — single string change in the Custom-template render path.

Functional · INFO severity (verified working / fixed)

INFO

FROM PREVIOUS QA

Verified shipped: template detail header has the framed icon + clean two-line layout (no descriptive subtitle)

Where to see: Open Account Management or Content — 8 articles/mo from the Templates sidebar.

Portal: Header renders: small framed icon tile (dark rounded square) on the left, title ("Account Management") to the right, chip row below (category pill + "↓ Click any field to edit" hint + RESET TO DEFAULT + ARCHIVE). No descriptive subtitle ("83 tasks across 12 phases" style) between title and chips. Matches the original's two-line shape.

Original: Same.

Fix: None. Templates R6 HIGH #1 closed.

INFO

FROM PREVIOUS QA

Verified shipped: sidebar template rows no longer show coloured category pills

Where to see: Templates page sidebar.

Portal: Each row renders icon + title + meta line ("12 phases · 6 onboarding items") only. No category pill between title and meta. Matches the original's clean sidebar.

Original: Same.

Fix: None. Templates R6 HIGH #2 closed.

INFO

FROM PREVIOUS QA

Verified shipped: "↓ Click any field to edit" hint pill is brand blue

Where to see: Account Management template header → the small pill in the chip row.

Portal: Pill renders with brand-blue fill + blue text + blue arrow. Same colour family as the primary CTA buttons + RESET TO DEFAULT hover. Reads as instructional, not as a warning.

Original: Same.

Fix: None. Templates R6 LOW closed.

INFO

FROM PREVIOUS QA

Verified shipped: RESET TO DEFAULT button renders on built-in templates including Account Management

Where to see: Open Account Management → top-right of the template header.

Portal: RESET TO DEFAULT button visible to the left of ARCHIVE. Wired to revert any edits to the seed.

Original: Same.

Fix: None. Templates R5 HIGH #1 closed.

INFO

FROM PREVIOUS QA

Verified shipped: + New template + Add phase work; new template seeding produces cards on create

Where to see: Templates page + Workflow 2's TEST SERVICE creation flow.

Portal: + New template adds a Custom row. + Add phase adds a phase to the selected template. Creating a service from a template seeds 83 cards into TO DO from Account Management (verified Workflow 2).

Original: Same.

Fix: None. Templates R5 HIGH #2 + add-service R1 HIGH #3 closed.

Build checklist

Every actionable finding (HIGH / MED / LOW). INFO items are listed in the body but not in the checklist. Tick each as it ships.

**LOW**

Custom template PHASES prompt still reads "Phases will appear as cards on the board." instead of the source's italic "Describe how this template's phases are paced"

Update the default PHASES subtitle on Custom templates to match the source italic copy. Same fix as Templates R6 LOW #5 — single string change in the Custom-template render path.
