

PORTAL QA · ROUND 1

Workflow 2 · Service lifecycle audit

May 15, 2026

Workflow 2 of 10 in the May 15 deep-testing pass. Walked the service lifecycle on the portal: Add service to Acme Corp, picked the Account Management template, created TEST SERVICE 1 - MAY 15 QA, opened the resulting board, opened a seeded card, posted a comment via Enter-to-send.

Surprise result: the dev has shipped a large chunk of the previous QA findings since the last pass. **13 fixes** verified live from kanban-board-qa-round1, add-service-qa-round1, and the additional-requests doc. Only **4 items** remain open on this surface (3 MED, 1 LOW; no HIGH).

The big wins: template seeding works (83 cards materialised from Account Management's 12 phases); breadcrumb shows the right client name; card modal has client-prefixed eyebrow + Checklist + comment input + Enter-to-send + Share button + correct date format; toolbar has all six filter controls; column headers are UPPERCASE with kebab affordances.

Still open: column kebab popover only offers "Archive all cards" (missing Rename / Change colour / Clear column); Star + "+ Due date" still misplaced inline with the breadcrumb; Members chip missing from the top-right; template-seeded cards have placeholder effort.

Findings ordered Functional (MED → LOW) then verified-fixed (INFO).

17 findings · 0 HIGH · 3 MED · 1 LOW · 13 INFO

Status legend: **HIGH** blocks scanning / breaks workflow · **MED** meaningful divergence · **LOW** polish · **INFO** matches or working as intended.

Each finding carries two chips. **Severity** (HIGH / MED / LOW / INFO) maps to impact. **History tag** (**FROM PREVIOUS QA** = carried over from prior QA, **NEW** = surfaced this round) shows which items the dev has been sitting on vs. fresh observations. **FROM PREVIOUS QA** items need triage first.

Functional · MED severity

MED

FROM PREVIOUS QA

Column kebab popover only offers "Archive all cards" — missing Rename / Change colour / Clear column

Where to see: Open any service board → click the kebab (■) on the right edge of any column header (TO DO, IN PROGRESS, BLOCKED, NEEDS REVIEW, DONE).

Portal: Kebab opens a popover with one option: **Archive all cards**. That's it. No way to rename the column, change its accent colour, or clear it without archiving.

Original: Original kebab opens a popover with four options: Rename column / Change colour / Archive all cards / Clear column. The four-action set lets an AM rebrand a column to fit their service (e.g. "NEEDS REVIEW" → "AWAITING APPROVAL" for regulated client work).

Fix: Add the three missing options to the column-kebab popover:

- **Rename column:** inline-edit on the column title (same atom as the breadcrumb click-to-rename pattern).
 - **Change colour:** opens a small colour-picker swatch grid; updates the leading dot + header tint.
 - **Clear column:** hard-deletes (or trashes) every card in the column. Confirmation dialog before action.
- Archive all cards stays as the existing option.
-

MED

FROM PREVIOUS QA

Star + "+ Due date" controls still misplaced inline with the breadcrumb instead of in the top-right actions row

Where to see: Open any service board → look at the top-left area next to the breadcrumb.

Portal: Breadcrumb is followed inline by:

- ■ Star (favourite toggle).
- + Due date pill (creation affordance for service due date).

Both belong in the top-right actions row with Project Brief / Settings / Analytics, not crammed against the breadcrumb. The due-date pill specifically should not be a breadcrumb-level control — service due dates live in Settings, not as a chip in the page header.

Original: Top-right actions row holds: ★ Star (filled when favourited, board name in the aria-label), Project Brief, Board Settings, Members chip, Analytics. Breadcrumb area is kept clean — Clients > Acme Corp > Service Name, with the last crumb being click-to-rename. No due-date pill anywhere in the breadcrumb area.

Fix: Move the star button into the existing top-right actions row, alongside Project Brief / Settings / Analytics. Drop the inline + Due date pill from the breadcrumb area entirely. If the service due date needs an entry surface, expose it inside Board Settings (Edit service details → Due date field).

MED

FROM PREVIOUS QA

Members chip missing from the top-right board actions row

Where to see: Open any service board → top-right action buttons. Count them.

Portal: Top-right shows three actions: Project Brief / Settings / Analytics. The original has **four** — the fourth is a Members chip showing a small avatar stack of board members + a count (e.g. "Members 2"). The portal omits this.

Original: Members chip sits between Settings and Analytics. Avatar stack of board members (usually 1-3 avatars overlapped); count label after. Clicking opens a small popover showing the full member list + their roles on this board.

Fix: Add a Members chip to the board actions row between Settings and Analytics. Read members from *service.memberIds* (or derive from *card.assigneeIds* across all cards on the board). Avatar stack capped at 3 visible + overflow count (" +2"). Click opens a popover with the full list.

Functional · LOW severity

LOW

NEW

Effort field on template-seeded cards renders as "— slots ESTIMATED" placeholder

Where to see: Open any card the template seeded (e.g. "N/A — not applicable for this team in this phase" in TEST SERVICE 1 - MAY 15 QA → TO DO) → Effort field in the card modal.

Portal: Field renders — *slots ESTIMATED*. Could be correct if the template card has zero effort defined (no upstream value), could be wrong if effort isn't being read from the template. Hard to distinguish "data says 0" from "data didn't read" without inspecting the template source.

Original: Cards seeded from a template that defines effort show the value (e.g. 3 *slots ESTIMATED*). Cards from templates that don't define effort show the dash placeholder, which is fine — user fills it in when the card moves to In Progress.

Fix: Confirm whether the Account Management template phases have effort values upstream. If yes, the seeding logic is dropping the field; wire it through. If no, ship a sensible default (e.g. 1 slot per task) so the user isn't filling 83 empty effort fields by hand.

Functional · INFO severity (fixes verified)

INFO

FROM PREVIOUS QA

Verified shipped: Add Service template dropdown lists ALL non-archived templates including built-ins

Where to see: Top → Clients → any client → + Add service → Template dropdown.

Portal: Dropdown lists 8 options: No template, Account Management, Content — 8 articles/mo, New template (×4 Custom), Test Template. Built-ins are present alongside Custom. Matches the Templates-page rail filtered to *!archived*.

Original: Same — all non-archived templates available for selection.

Fix: None. Add-service-qa-round1 finding closed.

INFO

FROM PREVIOUS QA

Verified shipped: Template option labels no longer carry the "(0 tasks)" suffix

Where to see: Same dropdown as above.

Portal: Options render template names only (Account Management, Content — 8 articles/mo, etc.). No count suffix. Matches the original.

Original: Same.

Fix: None. Add-service-qa-round1 finding closed.

INFO

FROM PREVIOUS QA

Verified shipped: Creating a service from a template seeds cards into TO DO

Where to see: Create TEST SERVICE 1 - MAY 15 QA with Account Management template selected → open the board.

Portal: TO DO column populated with 83 cards matching the Account Management template's phases. Cards land in TO DO with title from the phase + subtask name. Other columns show 0 / empty state.

Original: Same. The whole point of templates is the seeding-on-create behaviour.

Fix: None. Add-service-qa-round1 finding closed.

INFO

FROM PREVIOUS QA

Verified shipped: Breadcrumb renders the correct client name (no "Client" literal)

Where to see: Service board top-left breadcrumb.

Portal: Breadcrumb reads *Clients > Acme Corp > TEST SERVICE 1 - MAY 15 QA*. Middle crumb is the real client name. Hard-coded "Client" literal is gone.

Original: Same.

Fix: None. Kanban-board-qa-round1 HIGH #1 closed.

INFO

FROM PREVIOUS QA

Verified shipped: Card modal eyebrow includes client prefix

Where to see: Open any card on the board.

Portal: Eyebrow reads *ACME CORP · TEST SERVICE 1 - MAY 15 QA*. Client name is present.

Original: Same.

Fix: None. Kanban-board-qa-round1 HIGH #2 closed.

INFO

FROM PREVIOUS QA

Verified shipped: Board Settings + Analytics buttons appear in top-right actions row

Where to see: Service board top-right action area.

Portal: Row now contains: Project Brief, Settings, Analytics. Two of the three originally-missing actions are present. Members chip still missing (see MED finding above).

Original: Project Brief, Settings, Members chip, Analytics. Three of the four match.

Fix: Partial — only Members chip outstanding.

INFO

FROM PREVIOUS QA

Verified shipped: Card modal has Checklist section + comment input + Enter-to-send wiring

Where to see: Open any card → left pane below Description → right pane Comments tab → comment input at the bottom.

Portal: Checklist section renders with + Add Task affordance. Comment input renders with placeholder "Write a comment... (Shift+Enter for new line)" + Send button. Pressing Enter in the textarea submits the comment (verified: typed "TEST comment for QA - May 15", pressed Enter, comment posted with author + timestamp + Reply / Delete affordances). Tab badge updates to *Comments 1*.

Original: Same — Checklist present, comment input present, plain Enter submits per the updated spec.

Fix: None. Kanban-board-qa-round1 HIGH #4 closed.

INFO

FROM PREVIOUS QA

Verified shipped: Activity Log tab labelled correctly (no count badge)

Where to see: Card modal right pane → second tab.

Portal: Tab reads *Activity Log*. No count badge appended.

Original: Same.

Fix: **None.** Kanban-board-qa-round1 MED closed.

INFO

FROM PREVIOUS QA

Verified shipped: Share button present in card modal header

Where to see: Open any card → look at the top-right header icons (bookmark / share / kebab / close).

Portal: Header now shows four icons: bookmark, share, kebab, ×. Share was missing in round 1.

Original: Same set of four icons.

Fix: **None.** Kanban-board-qa-round1 LOW closed.

INFO

FROM PREVIOUS QA

Verified shipped: Card modal date format uses American (May 15, 2026)

Where to see: Card modal left-pane footer ("Created May 15, 2026") + right-pane Activity Log + comment timestamps.

Portal: Renders *Created May 15, 2026* and comment timestamps as *May 15, 2026, 11:51 AM*. American format, AM/PM uppercase. Matches the app-wide convention.

Original: Same.

Fix: **None.** Kanban-board-qa-round1 LOW closed.

INFO

FROM PREVIOUS QA

Verified shipped: Toolbar filter set complete (Priorities / Assignees / Labels / Dates / Sort / Group)

Where to see: Board toolbar row.

Portal: Six controls visible: All Priorities, All Assignees, All Labels, All Dates, Sort: Manual, Group: None. Plus search input (with F hint) and a right-aligned card count ("83 cards"). The previously-missing Labels, Dates, and Group filters are all present.

Original: Same set.

Fix: **None.** Kanban-board-qa-round1 MED closed.

INFO

FROM PREVIOUS QA

Verified shipped: Column headers UPPERCASE + per-column kebab

Where to see: Each column header on the board.

Portal: Headers render *TO DO 83* , *IN PROGRESS 0* , *BLOCKED 0* , *NEEDS REVIEW 0* , *DONE 0* . UPPERCASE labels with kebab on each. Kebab popover content is incomplete (see MED finding above) but the affordance is there.

Original: Same.

Fix: **None.** Kanban-board-qa-round1 MED closed (column-kebab popover content separate finding).

INFO

FROM PREVIOUS QA

Verified shipped: Empty-column copy matches the original

Where to see: Any empty column on the board.

Portal: Empty state reads *"No cards yet — drag one in from another list."* Same as the original.

Original: Same.

Fix: **None.** Kanban-board-qa-round1 LOW closed.

Build checklist

Every actionable finding (HIGH / MED / LOW). INFO items are listed in the body but not in the checklist. Tick each as it ships.

- ☐ **MED** **Column kebab popover only offers "Archive all cards" — missing Rename / Change colour / Clear column**
Add the three missing options to the column-kebab popover:
 - **Rename column**: inline-edit on the column title (same atom as the breadcrumb click-to-rename pattern).
 - **Change colour**: opens a small colour-picker swatch grid; updates the leading dot + header tint.
 - **Clear column**: hard-deletes (or trashes) every card in the column.Confirmation dialog before action.
Archive all cards stays as the existing option.
- ☐ **MED** **Star + "+ Due date" controls still misplaced inline with the breadcrumb instead of in the top-right actions row**
Move the star button into the existing top-right actions row, alongside Project Brief / Settings / Analytics. Drop the inline + Due date pill from the breadcrumb area entirely. If the service due date needs an entry surface, expose it inside Board Settings (Edit service details → Due date field).
- ☐ **MED** **Members chip missing from the top-right board actions row**
Add a Members chip to the board actions row between Settings and Analytics.
Read members from *service.memberIds* (or derive from *card.assigneeIds* across all cards on the board). Avatar stack capped at 3 visible + overflow count (" +2").
Click opens a popover with the full list.
- ☐ **LOW** **Effort field on template-seeded cards renders as "— slots ESTIMATED" placeholder**
Confirm whether the Account Management template phases have effort values upstream. If yes, the seeding logic is dropping the field; wire it through. If no, ship a sensible default (e.g. 1 slot per task) so the user isn't filling 83 empty effort fields by hand.
